

Synopsis of Approved Projects (59)

BCCI File#	APPLICANT NAME	PROJECT TITLE	SYNOPSIS
2121	Adams Lake Indian Band	Comprehensive Community Planning	Building on previous activities (CCP pre-planning and planning), the 2009-10 BCCI project will provide a framework for planning and decision making, key features of a comprehensive community plan will be the achievement of associated deliverables including: A "macro" community strategic plan, Departmental strategic plans and strategies that are consistent with the community plan, Integration of services and processes, Transparency, and Community will is recognized and supported.
2019	Akisqnuq First Nation (Columbia Lake)	Building Capacity to Implement and Monitor the Comprehensive Community Plan	<p>The key deliverable will be to build on the success of our current project to continue to build momentum into the implementation and monitoring of our Comprehensive Community Plan and ensure project completion.</p> <p>The main approach is to receive training to implement projects and activities identified in four key sectors (Social, Lands and Resources, Economic Development, and Governance) of our CCP that was recently confirmed by the community through our preplanning component of the CCP. The approach will be that the community will be consulted throughout this process and will be provided with an opportunity to gain training and to assist Council in developing the Comprehensive Community Plan.</p>
2064	Alexandria First Nation (Esdilagh)	Management of Lands & Resources Phase I	The Alexandria (?Esdilagh) Band is proposing to develop a land use plan draft; develop a lands and resources database; gather historic information.
2035	Carrier Sekani Tribal Council	Regional Land Use Planning Project: Training and IM	The Tribal Council is proposing to rehire technical staff to continue supporting land use planning and mapping; train 25 community members/staff in the area of land use planning and mapping; assist CSTC First Nations with Strategic and Operational Planning for information management (natural resource sector); support the development of centralized mapping services.
2103	Chehalis and Scowlitz Indian Bands	River to Plate - Chehalis-Scowlitz	This project will create a quality management and traceability program, along with a supporting procurement plan, pilot training program, and resources sharing agreement for the developing Harrison River commercial salmon fishery involving the Chehalis and Scowlitz Bands and their fishermen.
2087	Cowichan Tribes	Maximizing Cowichan Tribes Lands/Resources Capacity and GIS Benefits	Increase access to the GIS system by providing orientation and hands on training for all departments. To expand the use of GIS to improve community mapping, crime tracking & analysis, 911 emergency response.
2063	Da'naxda'xw/Awaetlala First Nation	Land Designation for Economic and Community Self Sufficiency	Da'naxda'xw/Awaetlala want to collect information on the resource potential of AOIs (areas of interest) in order to assist in negotiating Treaty Settlement Lands. AOIs will be examined for their economic and community development potential, with a view to incorporating into a Final Agreement those that will contribute to the self-sustainability of the band.
2089	Ditidaht First Nation	Parks and Protected Areas	This project will result in A MOU with Parks Canada, a MOU with the Ministry of Tourism, Sports and the Arts for Forest Recreation Sites and a MOU with Ministry of Environment for provincial parks and protected areas. There will be records of twelve BCCI Committee meetings, two Treaty Committee meetings, three Band meetings, and twelve Council meetings.
2068	Ehattesah First Nation	Aboriginal Interest and Use Study	Ehattesah aim to develop a report on the coastal resources located in their traditional territory through data collection and community consultation. The intent is to produce a comprehensive marine and coastal resources management report that can be used as baseline data in consultation processes with the Crown.

BCCI File#	APPLICANT NAME	PROJECT TITLE	SYNOPSIS
2042	Esquimalt Nation	Esquimalt Nation CCP	To improve the management of newly acquired resources. Despite the success of increasing the land and resources the Nation is experiencing difficulties in managing the newly acquired resources. The management of land and resources from the Aboriginal Rights Settlement agreements has been fragmented and reactive at best. In efforts to begin addressing the gaps related to the management issues the Nation recognizes that sound land and resource management must begin with a Vision and a plan. More specifically, the Nation recognizes that that based on its traditional values that planning must include the community as a whole. This approach is what we hope is more of a comprehensive approach.
2120	First Nations Alliance 4 Land Management	Planning & Development Strategies for First Nations Land Managers in BC	FNA4LM want to enhance member Land Managers' governance skills through 3 development workshops. The subjects of the workshops will be: Comprehensive Community Plans, Negotiations, and Policy Development.
2006	Fraser Thompson Indian Services Society	Nlaka'pamux Strategic Information Program	Building on 0809 BCCI, support for Forestry Manager and 1 assistant through continued development of the NNTC Strategic land use plan and completion of 2 components of the operational management strategies. Development and implementation of functional web tracking system for community members and for a referral tracking system. 7 mapped interviews by trained Elder's with membership. Ongoing capacity building and facilitation in 10 meetings of the NNTC Forestry Technical working group community members. Further development of safety programs in fuel management, environmental and wildfire protection plans within communities.
2060	Gwa'sala-'Nakwaxda'xw First Nation	Lands Designation for Treaty	Gwa'sala-'Nakwaxda'xw want to compile information on land and resources in their Homeland area, which will be contributed to their developing Comprehensive Community Plan. It will also be used to determine Areas Of Interest and, ultimately, assist in negotiating Treaty Settlement Lands.
2115	Heiltsuk Tribal Council	Strategic Planning for GIS & Referrals Coordination	To establish a strategic plan to sustain and further develop our GIS (Geographic Information System) department. We have extensively researched a model widely used in the outside world for planning for GIS, but not to our knowledge within a First Nation community. We wish to establish greater awareness within our community of GIS and how it can support and enhance existing departments and interagency initiatives.
2038	Hesquiaht First Nation	Hesquiaht Comprehensive Community Plan	During treaty preparation work in 2007 the community identified the need to implement comprehensive community planning (CCP) initiatives, to initiate mapping of the territory and to establish processes to ensure that all of the community members have an opportunity to be included in the community planning process.
2003	Hupacasath First Nation	Protecting our Resources through Capacity Building	The Hupacasath Band is proposing to train staff in GIS; upgrade information technology; develop a communication strategy; and rain 2 certified environmental monitors and fisheries technicians.
2041	Kitamaat Village Council	Haisla Resource Stewardship Training and Implementation	The band is proposing to have 12 people trained to work as guardian watchmen. Training modules consist of: safety, natural resources and ecology (habitat identification), cultural knowledge and interpretation, monitoring and compliance and hospitality.
2067	Kitseles First Nation	Comprehensive Sustainable Community Development Plan	This purpose of this project is to: a) create a document that considers and outlines all current projects and economic initiatives in progress and share the compiled information with community members. This will aid discussions and goal setting for the sustainability and enhancement of these and future projects; b) use information gathering to complete a preliminary skills gap analysis that is directly related to the current projects and looks to the future; c) for future initiatives, answer what it is we would like to achieve and what are the possible impacts of those goals or objectives?
2016	Kwicksutaineuk Ah-kwaw-ah-mish First Nation	Kwicksutaineuk Ah-kwaw-ah-mish Land & Marine Use Management Project	This project will look at harmonizing the land use plan being created now with the Marine Use Plan, emphasis is on community capacity to decrease dependency on outside expertise by creating two positions for, and in conjunction with the mentoring and training of, two community members.

BCCI File#	APPLICANT NAME	PROJECT TITLE	SYNOPSIS
2015	Lake Babine Treaty	Lake Babine Land Use Planning Project	This is a beginning stage in development of a land use plan, with community consultation, the development of a Community Vision document and the completion of policies for land use types to provide guidance for future negotiations and planning. Two band members will be selected to conduct interviews and hold three workshops, with the help of a project coordinator to facilitate the collection of community knowledge and input into the land use plan. The two community members will be mentored, for approximately 6 months to 1 year, in local community land use planning.
2059	Lil'wat Nation (Mount Currie)	Land Use Planning Implementation Support and Community Engagement Project	Building on previous BCCI, the project will fill in identified gaps remaining from 4 ongoing planning initiatives including the upcoming CCP. 2 GIS technicians will be hired and received intro/advanced training. The techs and project manager will research archives and create comprehensive maps of existing infrastructure and traditional sites on reserve and surrounding Mount Currie area. Community engagement planned with 3 meetings, recorded interview of 10 Elders, and the development of community and education opportunity packages. Spatial and non spatial data and mapping will be captured on a new secure data management system server to be set up.
2013	Lower Kootenay Indian Band	Building Capacity to Implement and Monitor our Comprehensive Community Plan	The implementation and monitoring of the Comprehensive Community Plan. Our approach is to receive training to implement projects and activities identified in the eight key areas of our CCP that was recently confirmed by the community through our preplanning component of the CCP. The approach will be that the community will be consulted throughout this process and will be provided with an opportunity to gain training and to assist Council in developing the Comprehensive Community Plan. The key deliverable will be to build on the success of our project by continuing to build momentum into the implementation and monitoring of our Comprehensive Community Plan.
2074	Lower Nicola Indian Band	Computerized Land Registry System	Lands management will research technical requirements to build a Lands Registry Computer system database in order to effectively collect, manage, and preserve information related to reserve and custom land holdings and transactions and within traditional territory.
2092	Malahat First Nation	Building Capacity for our Future "Land and Resource Manager"	Malahat FN have identified a gap in their capacity to manage their land and resources. They would like to address this by assessing where they are at and identifying current and future needs, and then training a Land & Resource Manager to work towards fulfilling their requirements.
2056	Metlakatla Development Corporation	Natural Resource Management Planning and Policy Framework	Metlakatla want to improve their efficiency in natural resource management. The goal of this project is to develop a natural resource management planning and policy framework to assist in decision-making and monitoring, and to take inventory of their current assets.
2028	Musqueam Indian Band	Comprehensive Sustainable Community Development Plan	Phase three of a four phase comprehensive, strategic planning process. This phase of project work would include a 'Policy Package' that would be used specifically to support the implementation of the project's Land Use Plan. Including 1) building permit and approvals process; 2) easy to use Land use Plan; 3) restructuring and/or modifying existing Musqueam departments; 4) a training program.
2106	Nadleh Whut'en First Nation	Building a First Nations Environmental Review Process for Major Projects in Nadleh Whut'en Territory	A coordinator will be hired to manage the documenting of interviews with community member and external experts (including First Nations) re a First Nations environmental review process for future reference and incorporation into other projects (e.g. Cultural Atlas). Three reports will be prepared - Literature Review for First Nations in Environmental Assessments, Discussion Paper of a First Nation EA Review Process, and General Report on the Findings of the project. At least 3 presentations made to community members/ First Nations in the region to discuss the project and its outcomes.

BCCI File#	APPLICANT NAME	PROJECT TITLE	SYNOPSIS
2039	Nak'azdli Band	Keyoh Management Plan Based on Traditional Knowledge	Trappers training for members and Land Use Planning Training for 1 member. Traditional use study archived for land and resource co-management. Trainees will assist Keyoh members and other FNs in stewardship within conflicting boundaries. Partnering with neighbour FNs and Prov. Park Development & Ecol. Reserve during visits to areas of common interest for development of a comprehensive management plan.
2095	Nicola Tribal Association	NTA Referral Consultation Protocol & Upgrades to Central GIS and File Systems	NTA will develop a protocol and framework for sharing traditional use data collected with members, other area First Nations and community after recent structural and administrative changes within NTA. NTA staff to be trained reestablished central GIS repository for file and database storage. GIS training for 1 NTA staff. Staff training on new GPS unit and training on field data input. Input of TUS into the web-based referral support application, to handle land and resource referrals and consultations.
2051	Nuu-chah-nulth Tribal Council Fisheries (Uu-a-thluk)	Building Management Capacity for Nuu-chah-nulth Ocean Resources	Uu-a-thluk is proposing to deliver a mentorship program providing on the job training in fisheries-based positions (2); coordinate an educational program for the youth that increases their ability to participate in careers in resource management; host a series of youth-elder exchanges (aquatic resources) to help transfer traditional knowledge and build capacity in harvest/preparation of ocean foods; build the council's capacity to be a model of traditional governance by supporting communications and cross-cultural exchange between various stakeholders.
2090	Okanagan Nation Alliance	Okanagan Nation Land Use Plan Phase II: Data and Knowledge Consolidation	Building on 08/09, ONA will produce layered LUS (Land Use maps) of/and for use by each community developed and stored on a database. Community engagement on resulting mapping will assist Council to define priorities. Series of in-depth interviews and TEK studies with Elders to be conducted and data stored. Web base or portal will be developed for ONA member access to information. Facilitate monthly Land Use Planning sessions with Okanagan Natural Resource Committee by incorporating ONA technical expertise gained.
2045	Penelakut Tribe	Natural Resources Management & Negotiator Trainees (Year 2)	To Enrol the Department of Natural Resources (DNR) Trainee into the GIS and the Hul'qumi'num language courses; Preparation of a Long Range Plan; Penelakut community consultation; and Creation of a community newsletter to update members with regard to Natural resource concerns, as well as further tools for greater community involvement in an eventual comprehensive land settlement.
2073	Quatsino First Nation	Quatsino Treaty Lands Selection: Parcel Identification	Currently in Stage 4 of the treaty process, QFN will investigate 3rd party interests in Areas of Interests (AOI) and evaluate suitability of AOI for community interests in economic development and sustainability for Chief Negotiator report. Community consultations will be held to develop community vision on treaty Settlement lands.
2102	Sechelt Indian Band	Land to Marine & Intertidal Resource Plan	This project will develop a foreshore, intertidal marine plan. Data and research will be input to GIS multilayered database for presentation to community. Youths will be trained during a Summer project on resource and planning considerations. Web site established incorporating messaging on intertidal and marine resources and harvesting notifications.
2034	Skeetchestn Indian Band	Skeetchestn Territorial Heritage Conservation Law and supporting Mapping Research	In order to assess cultural sensitivity throughout their traditional territory, Skeetchestn intend to update the Territorial Heritage Conservation law & implementation protocol, and engage in zoning & mapping of culturally sensitive areas.
2084	Sliammon First Nation	Land Use Plan - Sliammon Reserve No. 1	This project will result in a completed Land Use Plan for Sliammon Reserve No. 1. It will build on previous planning and capacity building projects designed to guide land use decision making and protect environmental and cultural resources. It will provide for accurate population projections to determine future demands for housing, infrastructure and land use.

BCCI File#	APPLICANT NAME	PROJECT TITLE	SYNOPSIS
2020	Snaw'naw'as First Nation (Nanoose)	A Visioning Process for the Snaw'naw'as First Nation	The Snaw'naw'as First Nation (SFN) seeks support in establishing a process of community involvement that will lead to a community-based "Vision" (establishing the Nation's overarching goals) as a first and distinct step in developing a Comprehensive Community Plan (CCP). The Tumuxw (land) that Nanoose Xwulmuxw Mustimuxw (First Nation people) occupy is 54 hectares, with an on-reserve population of approximately 200 persons.
2083	Snuneymuxw First Nation	Lands and Resource Management Program	This project will result in the implement the Snuneymuxw Comprehensive Plan by further developing a detailed Land Use and Resource Plan. The capacity gaps that will be addressed include hiring and training a lands and resource manager, developing policies and management plans, updating an inventory of lands and resources in SFN traditional territory, and consulting with local governments and SFN community on land and resource issues.
2033	St. Mary's Indian Band	St. Mary's Band Comprehensive Community Plan - Phase I	They propose to undertake the pre-planning and planning stages of a Comprehensive Community Plan, which will enhance capacity to prepare for consultation and negotiation of lands and resources components of current and future settlement agreements. The overall aim of this project is to have a clear and consistent, formalized voice for and by their community, which directs the future of land and resource use, as well as, in a more holistic sense, all other areas that are key to a community being self-determinant and flourishing over the long run.
2021	Stellat'en First Nation	Geo-Spatial Natural Resource Monitoring & Referral Tracking Capacity Development	This project will mobilize the resources needed to effectively monitor, document and store data relating to Stellat'en natural resources, train 8 community members in handling and operating GPS and GIS used for natural resource monitoring, establish a Geo-spatial database of Stellat'en First Nation traditional territory-natural resources, and research, document and store Stellat'en First Nation interests in archaeological sites, cultural and heritage sites, and ethno-botanical species.
2044	Sto:lo Nation	Transitional Training II	This project is a continuation of the 08/09 Transitional Training BCCI project. The overall intent is to assist First Nations who are undergoing the transition from operating under a co-managed land code to becoming an Operational FNLMA band (thus, operating under their own land code). Specific to this year's proposal, Sto:lo Nation intend to implement the training outlined in the 08/09 project, and create partnerships/networks amongst organizations related to aspects of land management.
2048	Stone Indian Band (aka Yunesit'in Government)	Yunesit'in Land Base Identification and Mapping	Yunesit'in seeks additional funding for 1 year to keep the 3/4 time researcher to conduct interviews and do mapping of traditional territories using natural resource skills. GIS certified training provided to researcher.
2124	Tahltan Central Council	Tahltan Territorial Vision and Land Use Plan	TCC will hire a consultant (Ecotrust) to facilitate and assist in creating a Tahltan territorial Vision and Land Use Plan on behalf of the Tahltan Nation. Tahltan staff will be mentored in land use planning activities and data collection and mapping.
2081	Takla Lake First Nation	Forging Our Future: TLFN Land Stewardship Planning	Takla Lake seeks funding to develop a Strategic Plan for the Heritage, Lands and Resource department. They will also do Strategic and operational development of an information management plan for the natural resources department. A GIS technician will be hired to develop resource maps and 2 Takla members/staff will be trained in areas of land use planning and web-GIS.

BCCI File#	APPLICANT NAME	PROJECT TITLE	SYNOPSIS
2024	Taku River Tlingit First Nation	Land Use Planning Coordination and Support for the TRTFN Land & Resources Department in Government	This project provides essential support and training for a Taku River Tlingit Land Use Planning Coordinator and a Taku River Tlingit community outreach lead, responsible for leading and coordinating a joint land use planning and shared decision-making process with British Columbia for the Atlin-Taku region. The project is critical for these demanding positions in the TRTFN, requiring advanced skills in project management and coordination, community consultation, negotiation, and planning. TRTFN staff are supported in this initiative by Round River Conservation Studies (RRCs) and Round River Canada (RRC) as project partners.
2094	Te'mexw Treaty Association (TTA)	Engaging the Community in Comprehensive Community Planning	Specifically, funding through BCCI will assist the three nations each to hire a dedicated coordinator to ensure project deliverables are met, community input is achieved and the plan has been developed and driven by the community. 'Having a clear collective vision for the future will assist the bands to more easily assess the treaty offer. For all three nations there is a very strong need to ensure coordination between the planning team, working committee, youth and the community. A great deal of work is needed to ensure this coordination occurs and CCP is delivered. Currently, there is a gap in achieving coordination between the community, groups and planning team. Each of the three nations is at a different level / gap. T'Sou-ke has produced a model to achieve the coordination, through the excellent work of Andrew Moore. Continued funding of this coordination is needed to ensure success. Both Malahat and Becher are working on the coordination, however there are significant gaps. Through the support, mentoring and expertise of planning specialists and maintaining the funding for the band CCP coordinators, along with the tools and funding to engage the community, elders and youth, this gap can be bridged.
2091	Tl'azt'en Nation	Natural Resource Information Management System	A Natural Resources administrator and a student (re mentoring/job shadowing) will be hired to develop a referral information management database with protocols, a Natural Resource Department Plan, an interdepartmental meeting and work schedule including departmental meeting minute summary reports, and a Natural Resource Department Annual Report re Personnel Evaluation of Administrator Effectiveness.
2008	Tsawataineuk Band	Dzawada'enuxw Traditional Territory Management Project	Tsawataineuk want to continue to enhance their abilities to manage their traditional territories by establishing a Land & Resource office, engaging in zoning and resource management of key areas, and expand on their Land & Resource Plan.
2040	Tsawout First Nation	Tsawout Comprehensive Community Plan	This project will assist the Tsawout Nation in a two fold aspect: (1) The development and implementation of a comprehensive community plan. A plan that is holistic in nature and scope, as opposed to the continued use of the outdated Physical Development Plan, that is primarily focused upon Capital issues with limited community planning values. (2) Will provided training to the Lands Committee, Tsawout Band members tasked with making land use recommendations to the Chief and Council, as Tsawout became an Operational Band on May 29, 2007. The suggested project approach will be to use a series of professional consultants and the Lands Department staff to develop the CCP and provide monthly training workshops to the Lands Committee members.
2061	Tsay Keh Dene Band	Tsay Keh Dene L&R - Protocol Wkpln & Community Based Computer Land Use Planning Tool Development	The project will result in sign off of a protocol agreement, negotiation of workplan and implementation of work plan re Reclamation and monitoring protocol agreement with government ministries - Mines, Agriculture and Lands, and Environment. There wil also be Capacity building in computer based information management and land and resource plan development, as one or more Tsay Keh staff will become proficient in tracking referrals, projects and in developing the Tsay Keh Dene land and resource plan.

BCCI File#	APPLICANT NAME	PROJECT TITLE	SYNOPSIS
2065	Tsleil-Waututh Nation	TWN Comprehensive Community Plan Phase 2	This proposal is to build upon and complete the TWN CCP Visioning Phase 2 process by March 31, 2010. The funds will be used to support the work of the CCP Coordinator, Community Planner and CCP Steering Committee in engaging the community in developing a CCP Vision for the community. The funds would also help to complete the Community Atlas of TWN Reserve lands to assist in the CCP Visioning process and for future land use and strategic plans of the Nation.
2101	Upper Fraser Fisheries Conservation Alliance	Regional Fisheries Liaison	The UFFCA has retained 9 Community Fisheries Representatives (CFR's) and plans to select five, who have proven track records working between the UFFCA and their respective bands or tribal councils, to be trained so they will be able to understand the referral process, how to deal with it, who to contact, to articulate the concerns, and to coordinate an effective process for support and follow up.
2082	Wet'suwet'en First Nation	WFN Comprehensive Community Planning (CCP)	<p>This project will:</p> <ul style="list-style-type: none"> - train 2 WFN members in the FNLUP Certificate program offered by UNBC Continuing Studies, as well as training in GIS; - develop internal and external information sharing and management policies; - continue the CCP process in order to develop strategic directions in various areas (i.e. economic development, education, health, etc.); - negotiate further discussions and agreements with neighbouring First Nations to resolve outstanding historical issues. <p>This plan will enable the community to become self sufficient by identifying the areas of needs and setting goals for the community to achieve. We will continuously meet with the on and off reserve membership communicating; the stages of planning, gathering community input, establishing a vision, and implement projects to achieve the vision set out. It will assist in bringing together the other plans and goals set out for WFN.</p>
2096	Wet'suwet'en Treaty Office Society	Environmental Monitor Assistant Program (EMAP)	This project will result in 24 students enrolling in an Environmental Monitoring Assistant Program (EMAP) at Northwest Community College School of Exploration and Mining from 4 at least First Nation communities, 18 students will graduate from EMAP and 12 will find employment within one year, depending on the state of the resource industry in that year. Two of those graduates will be sponsored to attend an industry conference within a year.
2027	Whispering Pines/ Clinton Indian Band	Building Capacity to Implement and Monitor our Comprehensive Community Plan	Whispering Pines is requesting funds to continue phase II of their Comprehensive Community Planning process, including the building of capacity to more effectively consult and negotiate with non First Nation groups and organizations.
2052	Williams Lake Band	Building T'exelc Geographic Information System and Decision Making	Funding is requested to hire and train 2 band members Resource Stewardship Coordinator and GIS Technician. Training will be provided through formal institutions and on the job to increase internal capacity. Funds also requested for purchase of a GIS workstation and to enable ratification of T'exelc Resource Stewardship Plan.
2046	Xat'sull First Nation	Watershed Planning & Analysis of Impacts	To prepare for negotiations and consultations funding is requested to; acquire additional archive information regarding the boundaries of the Xat'sull traditional territory; draft agreements with adjacent First Nations regarding shared territories; draft Subsurface Guidelines for Xat'sull in dealing with government & third parties; create an overview map of traditional territory showing current impacts from logging and proposed future impacts on the watersheds along with detailed mapping & analysis of 2 key watersheds within the traditional territory with a focus on mining & subsurface issues.

BCCI File#	APPLICANT NAME	PROJECT TITLE	SYNOPSIS
2110	Xaxli'p First Nation	Xaxli'p Comprehensive Community Plan	The Xaxlip community would like to undergo a comprehensive community planning process that will follow a 7-step planning process that will be carried out over a 12-month time frame. Key deliverables include a comprehensive community plan outlining short and long-term planning priorities, consultation sessions in developing a vision, future goals and objectives, and capacity is enhanced as community members acquire planning related skills.
2014	Xeni Gwet'in First Nations Government	Xeni Gwet'in's Ecosystem-based Plan User Guide	The band is proposing to: develop a User Guide to the Xeni Ecosystem-based Plan; develop a document to understand and use the Tsilhqot'in Stewardship Portal (previously developed) as it relates to the Xeni Ecosystem-based Plan; hire 2 band members to work with the technical consultants and 1 band member to work with the Project Manager.

Synopsis of Approved Projects (59)

BCCI File#	APPLICANT NAME	PROJECT TITLE	SYNOPSIS
2240	Adams Lake Indian Band	Comprehensive Community and Land Use Planning	Create a Land Use Planning Framework to establish land use policies and guidelines drawing on the processes and achievements of the 2009/2010 CPP. Hire a Land Use Coordinator to oversee the project. Develop land use designations, policies and land and resources management plan for unsettled territory.
2237	Carrier Sekani Tribal Council	Strategic Land Use Planning: Referrals, Conservation and Carbon	CSTC and its partners, will develop a Toolkit for First Nations to Access Carbon Markets. A Land Use Planning Coordinator will be rehired to manage this project and conduct research and analysis required for CSTC and its member First Nations that are overwhelmed with referrals and poor government consultation policies/ regulations.
2258	Coldwater Indian Band	Water Stewardship & Drought Management Plan	The purpose of the proposal is to develop a Framework for Water Management Plan and develop a Framework for a Drought Management Plan.
2268	Cook's Ferry, Coldwater, Siska, and Ashcroft Indian Band	Cultural Species Management and Stewardship	The purpose of the proposal is integrate 10 species habitat models and cultural information into a web-based application; develop, compile and implement management guidelines for the 10 species by ecological unit; train community members; and, develop up to fourteen more cultural models for the over 150 species of cultural use and importance to the communities.
2264	Daylu Dena Council (Lower Post First Nation)	Community Lands and Resource Office	The Council is seeking funding to hire a Land and Resource Officer who will be trained and mentored in communication, information collection and management systems pertaining to lands and resources. They also seek funding for an improved and updated information management system.
2259	Dease River First Nation	Community Lands and Resources Office	The Council is seeking funding to hire a Land and Resource Officer who will be trained and mentored in communication, information collection and management systems pertaining to lands and resources. They also seek funding for an improved and updated information management system.
2221	Ditidaht First Nation	Wildlife Data project	Ditidaht will hire a Data Entry Clerk to timely response to referrals, purchase a referral software system and begin data collection, storage and retrieval, and hire a consultant to draft a MOU with the MoE on wildlife where Band Council will have the final decision and signing authority.
2207	Fraser Thompson Indian Services Society	Nlaka'pamux Strategic Information Enhancement	The purpose of the proposal is to hire a forestry manager; further develop the cultural resource database; develop an action plan for wildlife areas.
2216	Glen Vowell Band	Taking Hold of Tomorrow	Band will create a job description, hire a coordinator, and have three facilitated information meetings to inform membership of Gitxsan Treaty Society activities and provide info packages and recorded meeting minutes. Other activities include a documented SWOT analysis, compilation of the historical data, completed vision and mission statement, and a list of community goals and objectives for the next ten years.
2303	Gwa'sala-'Nakwaxda'xw Nation	Land & Resource Governance Under Gwa'sala-Nakwaxda'xw Constitution	G-N are currently working toward the development of a Constitution. This project will contribute to this goal by focusing on land & resource management and governance in a constitutional context. Output includes an examination of constitutional governance models, a comparative analysis of land registry models, and the development of a training module to educate leadership in aspects of good governance.
2290	Heiltsuk Tribal Council	Title and Rights Department	The Heiltsuk Tribal Council seeks funding to implement their Integrated Planning Process. Funding would be used to create a records management system and hire an expert in records management and an individual who would be responsible for the title and rights department.

BCCI File#	APPLICANT NAME	PROJECT TITLE	SYNOPSIS
2283	Ka:'yu:'k't'h/Che:k.tles7e t'h' First Nations	Parks Management and Planning	Project is to implement MOU with the Province as part of the Final Agreement. This would allow for increased involvement in the management and operations of Provincial Protected Areas in their traditional territory. Plan to hire a community member eventually become park manager, To search and catalogue all information on the 10 protected areas. Create a final survey document. Implement Guardianship program in Brooks Peninsula Provincial Park, Big Bunsby Marine Provincial Park, Checlet Bay Ecological Reserve and Solandar Island Ecological Reserve. Create a draft Management Plan for Brooks Peninsula Provincial Park.
2239	Kitseles First Nation	Comprehensive Community Plan	The Kitseles First Nation seeks to implement legislative and policy structures in order to make informed land, resource and community decisions. Funding would be used to produce a lands and resources legislative development manual in the hope that this would lead to the development of a tested road map for the development of legislative instruments.
2305	K'omoks First Nation (Comox)	Traditional Subtidal Species-Shellfish Resource Management And Capacity	K'omoks FN wishes to expand their aquaculture operations to incorporate sub-tidal species by developing inventory assessments, continuing negotiations with various governmental and aquacultural organizations, and implement a plan for the sustainable management of aquacultural resources.
2256	Ktunaxa Nation Council Society	Use and Occupancy Information	The Ktunaxa Nation Council Society seeks to develop a Use and Occupancy Strategy with the intent to consult in a meaningful way and determine the impacts of land and resource activity to Ktunaxa Aboriginal rights. They would like to train an existing staff member in UaO research.
2292	Kwadacha First Nation	Historical Land Use Legacy Project	Elder's Committee will research the traditional territory and land use of the Kwadacha people. Elders will meet regularly to plan and tour their traditional territory, including historically significant archaeological and sacred sites. Their knowledge will be recorded in digital video and written format, forming a data inventory for future land use planning.
2257	Kwicksutaineuk Ah-kwaw-ah-mish First Nation	Land & Resource Development Project	This project intends to build on the previous land use project - by retaining project employees and following the next steps laid out in their TUS scoping project. The Kwicksutaineuk Ah-Kwaw-ah-mish FN have also signed an MOU with neighbouring Tsawataineuk to work together in land and resources and as part of this project, they wish to develop policies and protocols to define relationships and how to deal with overlap issues.
2273	Kwikwetlem First Nation	Comprehensive Community Plan	In 2008 KFN was granted with P&ID funds to develop CCP outline process. This CCP project proposal is a continuation of the previous work done. Hire a Project Manager and consultants to assist in developing the framework, workplan for the CCP. Researching information and mapping, initiate the CCP plan process. Community engagement meetings and workshops.
2202	Laich-Kwil-Tach Treaty Society (Hamatla Treaty Society)	Fish Trap and Clam Garden Inventory	Laich-Kwil-Tach Treaty Society wishes to create an extensive inventory of fish traps and clam gardens within their territories. Members will also be trained in the field of cultural heritage, with the long term goal of managing their heritage sites by eventually developing a heritage management plan.
2272	Little Shuswap Lake Indian Band	Community Vision Project	Revisit Community Vision to create masterplan for Chief and Council. Hire a land use Advisor in order to achieve organizational clarity, better defined roles and duties to prioritize and track decision making with regard to lands and resources. Tools used: Mindmapping and Outcome mapping.

BCCI File#	APPLICANT NAME	PROJECT TITLE	SYNOPSIS
2278	Lower Similkameen Indian Band	Gathering Our Resources - Steps to Cohesive Land Management	The focus of this project is to produce an updated/ expanded community driven land use plan built on previous efforts by the LSIB relating to land and natural resource use because currently, there is no capacity or supportive frameworks in place to effectively engage the community and Chief and Council jointly for land management decision making. This project will promote community engagement, draft a land use plan, document environmentally and culturally sensitive areas, and establish guidelines for land use to gauge off reserve development.
2302	Musqueam Indian Band	Musqueam Community Planner Capacity & Training Program	The purpose of the proposal is to develop a comprehensive training program.
2241	Nadleh Whut'en First Nation	Consultation and	This project will assist the Nadleh Whut'en FN with developing capacity in the areas of internal/external consultation policy, mining policy and pipeline policy. Apart from working closely with the Nadleh Whut'en community as a whole, the project calls for the Nadleh Whut'en to work closely with neighbouring Stellat'en FN as well as partners, the Carrier Sekani Tribal council and Sacred Headwaters Alliance.
2218	Nak'azdli Band	Keyoh Organizational Plan Based on Traditional Knowledge and the Development of a Draft Consultation	Develop a draft consultation and accommodation framework specifically dealing with the Forest Planning process. 20 Stewards will have the "opportunity to ground truth (GPS) their traditional sites, info will be input into Band's GIS and mapped to advance consultation and accomodation".
2250	Namgis First Nation	Archeological & Culturally Modified Tree Training & Field Work Experience	This project will involve hiring 8 'Namgis community members for intensive training in culturally modified tree identification and archaeological field research techniques. The training of a new group of cultural research field workers will ensure the further evolution of the 'land use decision-making tool' (a stewardship tool) the 'Namgis had previously developed.
2209	Neskonlith Indian Band	Charting Out a Holistic Inclusive Future	The proposed project the Neskonlith administration wishes to implement is a continuation of the win-win negotiation project the community implemented during 2008/2009 (Negotiating with Purpose & with Environmental Results Based Objective). The project will implement a CCP by establishing community engagement tools, prioritize long term goals, shorter immediate objectives and potential immediate projects. The final objective is to hire a CCP champion.
2203	Nooaitch Indian Band	Comprehensive Land Use Plan	The Nooaitch Indian Band seeks funding to hire and train a Land Manager and develop a Land Use Plan and Land Management policies. They hope to enhance their capacity in preparing for consultation, negotiations and management of their natural resources.
2211	Nuu-chah-nulth Tribal Council	Training, Education and Mentorship Project	The project will deliver an aquatic-based three-tiered training and mentorship program for 16 adults and 10 to 15 high school students, training for hosting intergenerational aquatic resource exchanges, a cultural connection to aquatic resources, and a culturally relevant salmon curriculum.
2295	Okanagan Nation Alliance	Land Use Plan Phase III: Standards, Policies and Implementation Plan	Phase III of the LUP will develop standards and policies to strengthen the land use plan. This phase will build upon the first two phases of Okanagan LUS where community visioning and active LUP mapping were conducted. Standards, Policies and Implementation Plan will be developed with community consultation and draft 1 of the Land Use Plan will be completed.
2210	Pacheedaht First Nation	Comprehensive Community Plan	The purpose of the proposal is to develop a comprehensive community plan which includes a land use plan, a communications plan and a community vision.
2224	Penelakut Tribe	Natural & Cultural Resource Management & Database Development - Year 3	The purpose of the proposal is to further develop a GIS database, train a GIS technician, hire an experience researcher and consolidate paper archive of history and natural resources.

BCCI File#	APPLICANT NAME	PROJECT TITLE	SYNOPSIS
2289	Sechelt Indian Band	Wildlife Inventory	Funding would be used to accumulate knowledge of how to consider best placements for land developments, integration of capital development projects and to manage the land-base for deer populations. They envision the information gathered offering a regional resource data information service for deer populations for the community. The funds would also be used to hire a consultant and technician and pay for helicopter transportation and administrative costs.
2235	Shuswap Nation Tribal Council	Interfacing Management of Natural Resource Governance with Technology	Hire a Aboriginal rights and Title Director to oversee project, a virtual library manager, researcher and a consultant who will develop a new and improved software to enhance the capacity of the 10 member communities of SNTC which will assist in decision making in consultation and land use management.
2228	Skatin First Nations	Pre-CCP Strategy - Phase I	The Skatin First Nations seek funding to commence a multi-year Comprehensive Community Planning project. AC Eagle Consulting will assist in the project. They will hire a planning assistant and assemble a planning team to gather baseline information on the community to see what gaps exist and to identify potential target projects.
2212	Snuneymuxw First Nation	Land Use and Resource Management Plan	The project is to develop a Land Use and Resource Management Plan as called for in the Snuneymuxw Comprehensive Plan. A Land and Resource Use framework is expected to be completed by March 2010, and this project will build upon that framework.
2248	Splats'in First Nation (Spallumcheen)	Linking Splats'in Governance and Human Geography	The purpose of the proposal is to examine and record genealogy and family groupings in relation to historical and present day land use and management. A genealogy & family ties to land use booklets will be created, as well as map showing historical boundaries.
2242	Stellat'en First Nation	Stellat'en Land & Resource Project: Establishing A Traditional Approach To Shared Territory Overlap	The development and codification of natural resource management laws relating to shared territories with other First Nations, development of a draft Hunting and Fishing by-law, and the engagement of elders in meaningful dialogues to address sensitive land management issues.
2293	Sto:lo Tribal Council	Network of Community Based Researchers	The Sto:lo Tribal Council proposes to establish a network of research staff based within STC member communities to establish the communication networks and community-based presence that they feel is required to move towards an effective regional approach to land and resource management activities. They seek to hire and maintain land and resource researchers at each of the STC member communities.
2291	Stz'uminus (Chemainus) First Nation	Forest Planning and Management Initiative	CFN wish to enhance their future commercial forestry activities by conducting an assessment of their forestry resources, and preparing a forest management strategic plan. Two band members will be hired to assist with both of these, as well as the creation of a Community Forest and the ongoing oversight of archaeological management, resources and negotiations of forest lands.
2294	Takla Lake First Nation	Forging Our Future - Phase II Implementation of the Strategic NR Plan	Develop a land and resource plan. Hire a coordinator to lead the project and research carbon credit approaches. A resource person will be hired and trained to input Takla's land and resource data into the GIS portal at the Carrier Sekani Tribal Council to respond to referrals more expediently. The CSTC GIS coordinator will act as a mentor. 2 Trainees to update and manage website.
2238	Te'mexw Treaty Association	Completing & Implementing Comprehensive Community Planning	This application takes a very similar approach to the Treaty Association's 09/10 BCCI Project. They are seeking funds to hire a coordinator for each of the three participating Nations in CCP. This coordinator with the assistance of a set dedicated budget would engage the community and assist in developing a comprehensive framework/Action Plan and vision.
2244	Tk'emlups Indian Band (Kamloops)	Traditional Land Use Inventory	Create a Traditional Land Use Inventory to complete a comprehensive report and to create overlay maps and a data base that reflect the cultural, spiritual and traditional uses within the identified traditional land. Information will be used for negotiation, consultation and accommodation activities. Project involvement includes hiring a GIS and Field worker and engagement from community members.

BCCI File#	APPLICANT NAME	PROJECT TITLE	SYNOPSIS
2301	Tlatlasikwala First Nation	Land Use Vision and Planning Framework	A Tlatlasikwala community based land use plan coordinator will be hired to carry out research and community consultation re develop of a comprehensive vision re land use, water, and resources vision and Land Use Plan framework with recommendations for completion.
2232	Tl'azt'en Nation	Traditional Knowledge Transfer Project	This project will incorporate traditional maps, transcribed oral history, and historic photography in digital format into an Information Management System. The IMS will be accessed to design a Traditional Land Use Plan, expand the current Natural Resource Management Plan, and aid in the consultation and accommodation process.
2226	Tl'etingox-t'in Government Office (Anaham)	Land and Resources Management Planning	The proposal will involve the development of a draft land use plan and a strategic land use vision statement. The project will involve a variety of information gathering strategies, and will involve direct knowledge transfer through job sharing and directed work.
2245	Tobacco Plains Indian Band	Comprehensive Community Plan - Phase 1	Tobacco Plains wish to complete the pre-planning and planning stages of creating a CCP, while engaging with external entities to ensure harmonious visions and explore beneficial partnerships.
2312	Toosey Indian Band	Strategic Land Plan	The BCCI portion of the project will be the development of Strategic Land Plan that will be a Council, Management and Membership process. The project will also include obtaining Arc view GIS software training to coordinate the Land documents, Implement Land Management plan and on-the-job GIS training and use.
2288	Tsawout First Nation	Ancestral Principles and Implementation in Strategic and Community Planning	This project will research, by way of workshops and community sessions with the Knowledge keepers/ Elders, and document Tsawout history and core ancestral principles, which the administration will use in the planning and implementation of programs, services, land and resource development.
2287	Tsay Keh Dene Band	Land and Resource Assessment, Reclamation, Monitoring and Community Awareness	Hire a consultant to mentor/train two field technicians in environmental assessment, monitoring and compiling land use information, how to develop a more detailed land use plan, start discussions re developing guidelines for water quality, and keep community members informed about contamination in the territory and steps being taken to address it.
2222	Tseycum First Nation	Pender Island Reserve #8 Land & Resource Planning	A land use and resource plan will be developed so Tseycum is fully informed, engaged, and equipped for any consultations and negotiations with Poets Cove Resort regarding any future developments on Pender Island Indian Reserve #8.
2276	Tsilhqot'in National Government	Stewardship Planning Portal Enhancement	The proposal involves the further development of TSPP, providing new capacity to Tsilhqot'in communities. This will involve data enhancements, new capabilities, and training and deployment within communities. The portal will also be offered as a tool for other First Nations and First Nation Organizations.
2263	Ts'kw'aylaxw First Nation	Comprehensive Community Plan - Implementation and Monitoring	The First Nation seeks to establish partnerships with key Ministries, Thompson Nicola Regional District and Squamish Lillooet Regional District to establish a land resource information and data inventory which is part of their Comprehensive Community Plan.
2260	Tsleil-Waututh Nation (Burrard)	The People of the Inlet: A Bioregional Atlas of Territory Marine Waters	Tsleil-Waututh wish to create a Marine & Foreshore Bioregional Atlas, incorporating marine oral history and stories from Elders, leading to a Site Specific Restoration Plan for a portion of the Burrard inlet.
2266	T'Sou-ke Nation	Building Capacity within Forestry and Environment	The T'Sou-ke Nation seeks to address their lack of a dedicated trained staff in forestry and gather important data that will be used by the Nation in the future for consultations. Deliverables include hiring a trained community member in forestry field work and an educated community worker and acquiring forestry related databases and maps.

BCCI File#	APPLICANT NAME	PROJECT TITLE	SYNOPSIS
2310	Upper Fraser Fisheries Conservation Alliance	Regional Fisheries Liaison	This project will continue the development of the five community fisheries liaisons officers (RFL's) to gain the expertise and professionalism to eventually advise and make recommendations to UFFCA member communities.
2313	Wet'suwet'en First Nation	Comprehensive Community Planning	Hire a local Project Coordinator for the organizing/documenting of information needed in the pre-planning stage of the CCP process. Train several community members/staff in FNLUP, mapping and information management. Agreements/protocols will be made with neighbouring First Nations to improve relations and resolve historical issues.
2304	Xat'sull First Nation (Soda Creek)	Planning and Cultural Heritage Management	This project will enhance capacity for consultation and negotiation specifically with the Integrated Land Management Bureau (ILMB). Xat'sull intends to: a) finalize their Watershed report, b) continue to organize and collect additional TUS information into a Cultural Management report, and c) negotiate an engagement strategy agreement with the Integrated Land Management Bureau.
2279	Xeni Gwet'in First Nations Government	Fishery Assessment & Overview of an Ecosystem Based Fisheries Management Plan For Care-Taker Area	The proposal is intended to identify fish and fish habitat data gaps existing in the work of 4 previously funded projects related to the Xeni Gwet'in Caretaker Area, and initiate an ecosystem based fisheries management plan. This will contribute to Xeni Gwet'in consultation, negotiation and management of fish resources.
2299	Yunesit'in Government (Stone)	Traditional Land Use Mapping and Cataloguing	The proposal involves taking previously gathered data and placing it on maps, and cataloging information. There is an expectation of transferring knowledge to youth and making use of the information in comprehensive community planning.

Synopsis of Approved Projects (54)

BCCI File#	APPLICANT NAME	PROJECT TITLE	SYNOPSIS
2480	?Esdilagh First Nation (Alexandria)	?Esdilagh Cultural Heritage Research and Inventory	?Esdilagh had in the past BC Capacity completed some archival research but as there are many other sources of archival information to search a more complete project is needed focusing specifically on collection of archival and traditional use information for ?Esdilagh this will better prepare Esdilagh in negotiations and work in cooperation with the ?Esdilagh Land Use Plan.
2468	Adams Lake Indian Band	Coordination of Referral and Tracking Program	To provide a coordinated approach to a referral and tracking process that maximizes the efficacy and efficiency of tools and processes that are already in place.
2485	Alexis Creek Indian Band	Alexis Creek Indian Band Land and Resource Planning	Creating the foundation of Land and Resource Management of Alexis Creek Indian Band Traditional Territories.
2408	BC First Nations Energy and Mining Council	First Nations Regional Workshops: Mining & Energy Updates	The BC FNEMC will organize and deliver regional workshops for BC First Nations on issues related to mining, energy and climate change projects. Sessions will include information on bioenergy strategies, negotiating agreements, as well and updates for these sectors. A Project Coordinator will also be hired to organized the workshops and be a resource for First Nations in BC to contact about energy, mining and climate change issues.
2434	Beecher Bay First Nation	BC Capacity Initiative--Community Driven Capacity Development	Beecher Bay First Nation (BBFN) has been working on its Comprehensive Community Plan (CCP) for several years and hoped to complete the plan last year. Funding was received from BCCI through the Te' Mexw Treaty Association (TTA) to assist in completing the plan, however, Beecher Bay did not receive funding through FNIF which was needed to complete the CCP. Funding from BCCI will allow BBFN to complete its CCP and move forward with their Road Map for the Future.
2406	Bonaparte Indian Band	Bonaparte Comprehensive Community Plan - BCCP	This project will involve the development of a Comprehensive Community Plan for the Bonaparte Indian Band, as well as building capacity internally in the areas of governance, planning and management in order to ensure active participation in the development and implementation of the Comprehensive Community Plan. The CCP will be developed using a community-based planning model that engages and values the input of all community members.
2401	Boston Bar First Nation	Traditional Land Use Research & Mapping	To research, map and inventory IR lands in terms of traditional harvesting sites, sites of archeological interest, gravesites, pictographs, trade/hunting trails and original Aboriginal settlement sites. To then use this information to create a Planning guide and Resource Manual to inform us during negotiation and land development planning. The project will result in the training of two local band members in GPS, mapping and database management.
2412	Canim Lake Indian Band	Preservation of Traditional Knowledge	To gather, organize and digitally capture the collective Traditional Use knowledge of the Canim Lake Band before it is lost.
2474	Carrier Chilcotin Tribal Council	Southern Carrier Heritage Trail Management Plan Review and Monitoring	A Draft Management Plan was developed for the heritage trail in 1992 by the Mackenzie Trail Association and the Provincial Government. There was little involvement by the six first nation communities located along the Nuxalk Carrier route. Four of these communities are seeking funding to assess the impacts of the Mountain Pine Beetle epidemic and wildfires to incorporating this knowledge, along with aboriginal values into the 1993 plan.
2456	Carrier Sekani Tribal Council	Decision Support Systems, Land Use Training and Carbon Toolkit	This Project will focus on 3 key areas: 1) providing technical support to CSTC members in areas of supporting decision-making and project assessments from referrals; 2) Provide certified (4 week long) Aboriginal Land Use Planning training to CSTC and other interested First Nations; 3) Continue with the First Nations Carbon Collaborative project with the IISD, CIER & First Nations Partners in the creation of a First Nations Carbon Toolkit.

BCCI File#	APPLICANT NAME	PROJECT TITLE	SYNOPSIS
2451	Cheam First Nation	Ground Zero: The Starting Point	Cheam is poised to make incredible strides in community and resource development. In tandem with our developing Community Health Plan, a Strategic & Comprehensive Plan that encompasses present and future community needs must be developed. Our community embraces the potential and responsibility inherent in Aboriginal Right & Title as it relates to land and resource management. Our plan seeks to reveal the family values and respect for traditional ways that have identified Cheam as a strong, capable Nation and to build on this strength to enhance prosperity on all levels into the future.
2427	Coldwater Indian Band	Development of Planning Documents Related to Water	Development of planning documents related to water (water use / management or drought management plans) Community Charter
2473	Cook's Ferry, Coldwater, Siska, and Nooaitch	Governance Policies and Management Development for Species of Cultural Importance	Continuing to develop the capacity of the communities by including the community members, leadership and Esh-kn-am staff in the development of management guidelines for 5 animal species of interest and the development of governance policies for 5 plant species of interest for the over 2.7 million hectares of the Nlaka'pamux area of interest, and by providing various training opportunities for the communities and the CRMS staff.
2428	Cowichan Tribes Land Department	Comprehensive Community Planning/ Pre-Planning/ Community Visioning	This funding application is for CCP pre-planning which will emphasize community engagement through community meetings, working groups, news letters, posters, some door to door contact, e-mailing and other methods that we find to be effective through the pre-planning process. We would like to identify a planning coordinator, team members including a communications outreach member, and develop a work plan to guide the planning process. We also plan to identify technical support and secure funding for the entire 3 - year project during this pre-planning stage. (This entire project would most likely extend over a 3-year period, as Cowichan Tribes is the largest band in BC and is located in an urban area, with almost half of our members off of reserve.
2436	Daylu Dena Council (Lower Post First Nation)	Negotiation Liaison Officer	Building on the BC Capacity Initiative project of 2010/11, the Negotiation Liaison Officer will, with the assistance of project partners, receive training in and implement new referral software, receive support in GIS mapping to develop a more technologically advanced information system for lands and resources information and enhanced ability to communicate information with Community, Chief and Council, and Kaska Negotiators.
2437	Dease River First Nation	Negotiation Liaison Officer	Building on the BC Capacity Initiative project of 2010/11, the Negotiation Liaison Officer will, with the assistance of project partners, receive training in and implement new referral software, receive support in GIS mapping to develop a more technologically advanced information system for lands and resources information and enhanced ability to communicate information with Community, Chief and Council and Kaska Negotiators.
2465	Dzawada'enuxw First Nation	Dzawada'enuxw Territorial Management Capacity Building Project 2011/2012	The DFN will look at training community members and L&R staff in the following: - watershed water flow training and analyzing of river especially as it pertains to flooding - training in cultural and archaeological site identification, analysis, recording and data storage - training in acquiring archival and academic research, analysis and data storage
2448	Ehattesah Tribe	Community Planning for Aquatic Resources	To support the negotiation and implementation of current and future title agreements related to aquatic resources, the Ehattesah Tribe must build our capacity to create aquatic resource plans that benefit current and future generations. This includes engaging members to develop a shared community vision for our fishery, building a knowledge base to support management decisions, and training local people.

BCCI File#	APPLICANT NAME	PROJECT TITLE	SYNOPSIS
2423	Esquimalt Nation	Esquimalt Nation Community Plan	The Esquimalt Nation is a small urban Nation surrounded by the City of Victoria and the Town of View Royal. With Limited Land, Water & Resources, having a Community Plan is critical to the long term viability and success of the Nation. The Plan was initiated by Chief and Council in the Spring of 2009. This funding application will allow the Plan to be completed and implementation to begin.
2517	First Nations Technology Council	FNTC IM/IT Services	The Council is seeking funding to address community gaps by implementing the First Nations Technology Council Strategy and Action Plan. They seek funding to hire a Project Manager and Researcher, delivery of training workshops and courses in the areas of GPS and records management and digitizing hardcopy information.
2421	Fraser Thompson Indian Services Society	Nlaka'pamux Resource Information Enhancement	Continued enhancement of the Nlaka'pamux Nation Tribal Council community capacity as land and resource management stewards, with particular focus on wildlife and cultural resources. This will be accomplished by blending professional expertise with traditional expertise, continuing to have open communication forums and by providing advanced training and work experiences for community members.
2457	Gwawaenuk Tribe (Kwakwaka'wakw Nation)	Gwawaenuk Capacity Building Project 2011	This project will set up a Land & Resource Department by training two community members in how to manage a lands & resource department, conduct traditional use knowledge interviews, store the data and incorporate into the band's GIS database. Members will be trained in using the Archaeological and Cultural Modification Identification, plotter, mapping, GPS, archival research, data management filing and storage, GIS mapping and small band referral systems.
2460	Halalt First Nation	Establishing a Land & Resource Department - Phase One	Halalt First Nation has identified a critical need for a lands and resources department to support Chief & Council decision making in three key areas: treaty negotiations, referrals, and as a complement to comprehensive community planning. This proposal seeks to address this need by identifying and training community members who will establish & maintain a knowledge base in the lands and resources sectors.
2491	Katzie First Nation	Katzie First Nation 2011-2020 Strategic Community Development Plan	In their traditional territories east of Vancouver (Pitt Meadows) KFN has been planning for sustainable ecological, social and economic development in preparation for management of lands and resources components of settlement agreements. This project will produce a 10 year strategic plan that will consolidate and harmonize the existing plans and continue to support the evolving vision of the KFN. This project addresses capacity needs identified in the Katzie Community Plan (see strategic plan capacity gaps p 48-49 documented in KFN community plan).
2419	Kitselas Band Council	Kitselas Comprehensive Community Plan	The next step towards self-government is the development of a Kitselas Comprehensive Community Plan. As an operational Land Code First Nation, Kitselas has the legal authority to manage its Lands in accordance with the goals and interests of the Kitselas Membership. This project will strategically document the long-term priorities of Kitselas Members and will provide the Kitselas Administration with the input required to make sound, transparent, and efficient decisions with respect to land use.
2497	K'omoks First Nation	Comprehensive Community Plan	The Comprehensive Community Plan completes previous planning initiatives and also adds several new components, including: a complete community profile showing demographic and economic trends, updated mapping, and a detailed review of the development potential of lands that will be acquired through the Treaty Settlement Process. The Plan will do more than establish a picture, it will be a blueprint for the future.

BCCI File#	APPLICANT NAME	PROJECT TITLE	SYNOPSIS
2502	Kwadacha First Nation	Historical Land Use Legacy Project (Phase II)	The Historical Land Use Legacy Project builds on the Phase I successes of Kwadacha's highly committed Elders who are eager to reconnect with the land and to impart their wisdom to the communities located across their traditional territory. In Phase II, Elders knowledge will be uploaded into a modern electronic database which will preserve the information for future generations, also making it accessible across the territory.
2463	Kwantlen First Nation	Comprehensive Community Plan - Phase 1	In Phase 1 of its Comprehensive Community Plan (CCP), Kwantlen First Nation will complete the Pre-Planning (Stage 1) and Planning (Stage 2) components of the CCP and chart the course towards a sustainable future. In Stage 1, Kwantlen will assess present and future community needs and engage the planning team. In Stage 2, Kwantlen will translate a community vision and values into specific steps to realize that vision.
2489	Lake Babine Nation	Developing a Comprehensive Community Plan	Lake Babine Nation is one of the largest Indian Bands in British Columbia. The Band is situated 142 miles west of Prince George, with a total membership of over 2200. The band has 27 - reserve land and five, which are inhabited year round. LBN deliver and services programs to all membership that live on the 5 communities on/or off reserve. Lake Babine Nation Chief and Council supports sustainability, self-sufficiency and improved governance capacity. Therefore, LBN Chief and Council will form a Planning Team that will consist of selected membership who will work with the LBN's technical staff members and a hired consultant to develop a Comprehensive Community Plan that will address planning for all Lake Babine Nation governance, land and resources, health, education, infrastructure development, culture, social issues and the economy.
2426	Matsqui First Nation	Comprehensive Community Plan Phase 1 - Preplanning and Planning	Matsqui First Nation would like to complete the pre-planning and planning stages of a Comprehensive Community Plan (CCP), while engaging with external entities to ensure harmonious visions and explore beneficial partnerships. Our project will provide for community engagement, participation and consultation that will result in a CCP constructed by the community for the community.
2415	Mowachaht/Muchalaht First Nations	Community Planning for Aquatic Resources	To support the negotiation and implementation of current and future title agreements related to aquatic resources, Mowachaht/Muchalaht First Nations must build our capacity to create aquatic resource plans that benefit current and future generations. This includes engaging members to develop a shared community vision for our fishery, building a knowledge base to support management decisions, and training local people. Two part-time staff to receive on-the-job experience re aquatic resource planning and management, collaborative decision-making, data creation and management, project management, and communications.
2484	Musqueam Indian Band	Framework for Governance Negotiations	Musqueam Nation is moving forward with self-governance as a way to empower the community and to effectively incorporate traditional forms of governance while removing obstacles in current governance structures where dependency exists and create structures of independence. Chief and Council have begun initial steps to formally engage Canada in self-government negotiations. A key process will be to develop the institutions of Musqueam governance through a comprehensive engagement strategy related to Musqueam land in order to provide a framework for negotiation.
2453	Nadleh Whut'en First Nation	CCP Phase 1 - Pre-planning & Planning	The Nadleh Whut'en First Nation will begin a formal process of developing a Comprehensive Community Plan (CCP) for its traditional territory, including Indian Reserve Lands. While some planning and research has been done in the past, it has not been within the framework of a formal CCP process. This phase will include compiling historical data, contemporary data and training community members and staff for a multi-phased CCP process.

BCCI File#	APPLICANT NAME	PROJECT TITLE	SYNOPSIS
2446	Nak'azdli Band	Inventory of Traditional Land Use, etc.	This project will take all the maps, audio and video Oral History obtained from the previous years and have them translated, transcribed, and put in digital format to be put into the Information Management database. This information will help design Land Use Plans. This will also help in defining the evolving governance structures and regulatory framework for land and resources management.
2430	Nazko First Nation	Land and Resources Management Plan	Nazko First Nation is in Stage 4 of the treaty process and has subsequently entered into an Incremental Treaty Agreement with The Government of BC. The Incremental Treaty Agreement gives the NFN early access to Treaty Lands for much needed economic development opportunities. By March 2011 the NFN will have completed a Land Use Plan through a TRM. Based on this plan the BCCI funding will assist in the next steps to develop a lands and resources management and governance regulatory frame work plan for the treaty settlement lands and traditional territory. Chief and Council, staff and community representatives capacity will be built to understand the complexities of land and resources management and governance.
2518	Nooaitch Indian Band	Nooaitch Comprehensive Community Plan	Nooaitch ndian Band Council has made it a priority to complet the community engagement and undertake a Commprehensive Community Plan using the INAC model. The Lands Manager and member Tecnicians will research technical requirements using the GIS system to build a Lands Registry Computer system database in order to effectively collect, manage, and preserve information related to reserve and custom land holdings and transactions and within traditional territory.
2414	Nuu-chah-nulth Tribal Council (Uu-thluk)	Developing Nuu-chah-nulth Management Skills, Protocols, and Goals	Uu-a-thluk proposes to build on past projects and ready Nations for treaty and fishing rights implementation by 1) supporting Nuu-chah-nulth youth and adults to develop skills related to aquatic resource management, and 2) by supporting the Uu-a-thluk fisheries forum to effectively guide the work of Uu-a-thluk and support Nuu-chah-nulth Nations in their negotiations with DFO on fisheries issues.
2443	Okanagan Nation Alliance	Okanagan Nation Land Use Plan Phase IV: Implementation and Integration	This year the three previous phases of work on the Okanagan Nation Alliance (ONA) Land Use Plan (LUP) will be Implemented and integrated in practice. To do so, the ONA and Member Bands will utilize the Web Atlas and the Okanagan Nation Alliance Decision Support System (ONADSS) in accordance with the draft Cooperative Protocol Syilx (Okanagan) Territory (CPST). The LUP Implementation Plan from 2010-11 will provide the strategies to follow. The ONA will influence land use decisions in the Territory in accordance with the community based LUP.
2477	Pacheedaht First Nation	A Community Vision "Iisaak - respect with caring"	The purpose of the project is to continue to develop a comprehensive community plan which includes a land use plan, a communications plan and a documented and passed strategic plan that highlights a community vision; To bridge communication gaps between members, staff, Chief and Council and to inform, educate and share information.
2405	Quatsino First Nation	Development of the in-house capacity to track and respond to referrals	This project is focused on addressing the following activities that the Quatsino First Nation needs to advance for community interests and values in negotiations, consultations and decisions pertaining to lands and resources within Quatsino territory: 1. Purchase and installation of Referral Tracking System ("RTS") to track and respond to referrals that is key to the consultation and accommodation process. 2. Completion of ESRI ArcGIS courses to develop the skills and technical capacity use and update the traditional use and GIS databases. 3. Hold community workshops to consult with and engage the Community to develop a community vision that reflects the future a community sees for the territory is needed to inform decisions pertaining to the use and management of lands and resources.

BCCI File#	APPLICANT NAME	PROJECT TITLE	SYNOPSIS
2506	Shackan Indian Band	Comprehensive Community Plan Implementation	This project will allow us to complete our Comprehensive Community Plan adopted by the community and Chief and Council and begin managing it effectively. Our project will also allow us to be prepared to negotiate claims, consult in land referrals, and discuss potential economic development initiatives associated with our lands in a timely response that is often encumbered by not having information readily available.
2450	Skeetchestn Indian Band	Skeetchestn Indian Band Place Names Data Collection	Funding is to gather more data to build upon the original Places Names project (B.C.C.I. 09-10). The funding will go towards training, elder interviewing for pertinent stories and other info, G.P.S. data collection, Cultural Heritage Assessment and photographic records of various locations. The accumulated data is to be stored on our G.I.S. database for future reference and use in responding to referrals and informing Rights and Title negotiations.
2435	Spuzzum First Nation	Spuzzum Comprehensive Community Planning Project	The Spuzzum First Nation is seeking opportunities to continue to develop and implement their Comprehensive Community Development Plan. This initiative is an opportunity for our members to reflect on how we would like our community to develop in the future. The CCP will address key issues of priority to our members including governance, land use and management, infrastructure, culture, social and economic development.
2471	St. Mary's Indian Band	St. Mary's Indian Band Strategic Land Use Plan and Spatial Analysis	Development of a Strategic Land Use Planning Framework, through mentorship and community-based consultative approaches, that aligns with our community's Strategic Plan and furthers SMIB's governance and management capacities. A substantial component of this project is to complete spatial analysis through pre-collected data of our lands and natural resources so as to increase information and decision-making capacities.
2467	Stolo Nation Society	Technical Infrastructure for the Development Referral Review Process	The Stó:lo Research and Resource Management Centre (SRRMC) has been mandated by Stó:lo Nation to substantively address referrals by implementing a Development Referral Review Process. The SRRMC is applying for funding to construct the technical infrastructure to support this process. The primary goals are the creation of integrated TLU and referral database-geodatabases and the development of a web portal for delivery.
2472	Takla Lake First Nation	Continuing our Pathway to Land and Resource Planning for TLFN	Takla will address specific gaps in our ability to effectively respond to land and resource developments in our territory and make further advancement towards a Land Use Plan by increasing our database of cultural resource information, providing training in skill essential to land use planning and resource management, and by ensuring that Keyoh groups and Band membership are directly involved in the planning/ negotiating processes.
2404	Taku River Tlingit First Nation	Land and Resources Capacity Building Project	Employment Skills Training to educate Taku River Tlingit First Nation Citizen's in key areas that support consultation, negotiation and management of land and resources. The training will enhance their capacity for implementation and management of current and future agreements. Training for land and resources on how to reply to land referrals.
2478	Tl'azt'en Nation	Tl'azt'en Nation Land & Resource Planning and Policy	Management of Lands; Overall community vision and strategic plan for land use planning. The ability to compile all data into one universal dataset managed by the Natural Resources staff and usable by Tl'azt'en departments and Tl'azt'en in general.
2490	Tsawout First Nation	Tsawout Traditional Use Study and Capacity Building Program	This Project provides for the implementation of Tsawout First Nation's Douglas Treaty Aboriginal Rights & Title Strategic Plan - already completed. A key part of this plan is the development of a Tsawout Traditional Use Study (TTUS) to support local cultural education, the management of cultural resources, the protection of Douglas Treaty Rights, and includes community training in consolidating currently held TTUS and the collection of additional oral history.

BCCI File#	APPLICANT NAME	PROJECT TITLE	SYNOPSIS
2499	Tsilhqot'in National Government	Environmental Monitoring/Mining Policy Development Program	This project will enhance the Tsilhqot'in National Government's capacity to engage with mining industry, and address environmental monitoring issues through development of a mining policy, and training of environmental technicians or monitors. The TNG's ability to engage with the mining industry on a technical level will also be improved with greater GIS skill development, hardware and software.
2417	Whispering Pines Clinton Indian Band	Implementation and Monitoring of our Comprehensive Community Plan	This project will allow us to finalize our Comprehensive Community Plan by implementing the social, cultural, environmental, and economic issues related to our lands and resources. This project will prepare us for timely responses to any issue, which is often encumbered by not having information readily available enabling us to determine and document our lands and resources and how to manage them effectively.
2500	Xat'sull (Soda Creek Band) First Nation	Resource Planning & Guides - Phase I	Xat'sull is working cooperatively with a couple different mining and energy companies and are finding that more guidance is needed as to the best practices to mining and energy development. This project would be to develop a Mining & Energy Best Practices Guidebook. This would help in fulfilling further work needed as directed by the Xat'sull Land Use Plan.
2445	Xaxli'p Community Forest Corporation	Xaxli'p Community Forest Landscape Restoration Plan	The XCFC Landscape Restoration Plan (LRP) combines the Xaxli'p Traditional Use Study (TUS) and Ecosystem Based Plan (EBP) into a plan that provides practical guidance for eco-cultural restoration activities that are aligned with the TUS and EBP. Capacity building includes community participation in the preparation of the LRP, and training for Xaxli'p and XCFC Board and Staff in the implementation of the LRP.
2409	Xeni Gwet'in First Nations Government	XG Land & Resource Governance Structure and Regulatory Framework	Xeni will hire a community member as project coordinator working with consultants to undertake community meetings with elders, youth and leadership as well as undertake review of Xeni existing plans and examine constitutional governance models. This project will focus on building and retaining community capacity while focusing on land and resource management and governance in a constitutional context for the XGCA.

Synopsis of Approved Projects (56)

BCCI File#	APPLICANT NAME	PROJECT TITLE	SYNOPSIS
2730	Ashcroft Indian Band	Referral and Accommodation Consultation Model	Develop a structured set of procedures for Land and Resource referrals by 1) building policies re: consultation and accommodation, 2) acquiring and integrating Traditional Use Study and Archaeological datasets from neighbouring First Nation communities, and 3) funding a full time permanent Natural Resource position and a consultant to advise Chief and Council regarding referrals within Ashcroft Traditional Territory.
2610	Canim Lake Indian Band	Preservation, Integration and use of Traditional Knowledge	1) Complete the preservation of Canim's Traditional Knowledge by transcribing tapes and creating a secure off-site data repository for all digital data (a third party data host). This is the logical completion of work done with BCCAPACITY in 2010-2011 by Canim. 2) Make Traditional Knowledge accessible and useable by organizing all of the digital data logically on the data repository site. Create user documentation/metadata. Access to this site can be controlled by a computer administrator working for Canim. Provide training on site use to Canim staff. 3) Integrate Canim's Traditional Knowledge data with current activities and practices by bringing together all spatial base-maps, Crown map themes, Canim Traditional Use themes, and Canim operational forestry data into a single seamless spatial database served by a web-application. The database/web application can then be used by Treaty, Forestry, the Referrals Department, educators or students at the Canim Lake Band. Traditional Knowledge data will be viewable in context to other data.
2648	Carrier Chilcotin Tribal Council	Grease Trail Management Plan and Tourism Orientation	Three additional personnel will develop skills in land management. Take last year's BCCI project, "...Heritage Trail Management Plan..." and the 1993 Alexander Mackenzie Heritage Trail Management Plan, engage each other and provincial government agencies and develop a new Nuxalk Carrier Grease Trail Management Plan.
2630	Cayoose Creek Band	Comprehensive Community Plan Phase 1 (Process)	Cayoose Creek community members, Chief and council and staff are ready to embark on developing a much needed Comprehensive Community Plan. The first phase of our CCP will encompass present and future community needs through the pre-planning process. We will then undertake the planning process which will incorporate family values and respect for tradition which will set the framework for implementation the next year. This will be done over a three year period.
2645	Chemainus First Nation	Aquaculture Management and Capacity Plan	Introduce self-management of aquaculture resources by training Band members with requisite skills through courses developed by Vancouver Island University, creating inventory of aquaculture resources, and implementing a plan to sustainably manage aquaculture resources and negotiate agreements with government and aquaculture organizations.
2688	Cheslatta Carrier Nation	Cheslatta Carrier Nation Traditional Land Use and Natural Resource Inventory	To enhance the resource management capacity of the Cheslatta Carrier Nation by developing human resource skills, preserving historical, traditional, and archaeological data on a digital cataloguing system. Cultural knowledge will be transferred to existing membership and future generations. Information will be also be used for negotiation, consultation, and accommodation activities related to natural resources within the Nation's territory.
2708	Cook's Ferry, Coldwater, and Siska Indian Bands	Management Guideline and Governance Policy Development and Co-stewardship Policy Development	The Bands need to develop Land Use Planning policies for areas that are culturally sensitive and for animal species important to the communities as resource development continues to expand within the Nlaka'pamux area of interest increasing pressure on these areas. The datasets received from NTA in 2011 need to be cleaned up and synthesized so they can support the protection of these important areas and the stewardship of the species.

BCCI File#	APPLICANT NAME	PROJECT TITLE	SYNOPSIS
2614	Cowichan Tribes	Comprehensive Community Plan - Phases 1 & 2	Cowichan Tribes will complete the first two phases of our four-phase CCP project. The first two phases will result in 1) the collection and organization of base data, some of which will be documented in a user friendly Community Profile and newsletter that will be used through all remaining project phases; 2) the creation of community-developed vision for the CCP reflective of our collective values; and 3) development and prioritization of supporting goals and objectives to support the realization of our community vision.
2652	Daylu Dena Council (Lower Post First Nation)	Daylu Dena Council Community Strategic Engagement Coordinator	The Community Strategic Engagement Coordinator will receive training to implement the new Strategic Engagement Agreement for government-to-government shared decision-making with BC. The Coordinator will build on existing Kaska capacity to implement the regulatory framework of the agreement regarding consultation, negotiation, implementation, and management of land and resource development decisions.
2695	Dease River First Nation	Dease River First Nation Community Strategic Engagement Coordinator	The Community Strategic Engagement Coordinator will receive training to implement the new Strategic Engagement Agreement for government-to-government shared decision-making with BC. The Coordinator will build on existing Kaska capacity to implement the regulatory framework of the agreement regarding consultation, negotiation, implementation, and management of land and resource development decisions.
2704	Ehattesaht/ Chenahkint Tribe	Building Aquatic Resource Management Capacity	The "Building Aquatic Management Capacity" project will support the Ehattesaht/ Chedahkint Tribe to implement the community based fisheries plan through training and mentorship in resource management. The project will also bring together key community stakeholders through a Steering Committee, community meetings and youth engagement.
2611	Esquimalt Nation	Esquimalt Nation Community Plan	This project is the third phase of the Community Plan process started in the fall of 2009. The first phase articulated the Sacred Trust as the basis for the Plan. The second phase developed the Goals, Objectives and program Initiatives. This third phase will focus on Implementation Strategies and building capacity within the Nation for ongoing Plan related decision making.
2666	First Nations Technology Council	Land & Resource Management System Phase I	FNTC will build the document and records management and referrals response/decision support software components, or modules, of a modular system designed to improve the capacity of First Nations to make land use decisions, including responding to referrals, populating land use plans and managing relevant information. Outreach for the implementation of a third module, the Web Atlas, currently under development, will be conducted to develop a fee for service model. The outreach results will be used to inform the implementation of the other two modules. A Sustainability Strategy will then be developed as part of a Business Plan for Common Services.
2705	Gitxaala First Nation	Fisheries Management Plan Development	The purpose of this project is to initiate the implementation of a Strategic Marine Use Plan by developing a more specific Fisheries Management Plan. By hiring a fulltime Fisheries Research and Planning Technician a Fisheries Management Plan can be developed to focus on fishing guidelines for community and non community members, an efficient catch monitoring system, a stream inventory program for monitoring salmon bearing streams, and joint management measures to use with government agencies.
2640	Gwa'sala-Nakwaxda'xw First Nation	Developing Tools for Gwa'sala-Nakwaxda'xw Land & Resource Management	To build on land-resource governance work in order to establish a concrete vision for land-resource governance, and to provide decision and management support tools to implement that vision in a practical and sustainable fashion. Proposed results include an endorsed Lands and Resource Use Plan, strategic plans for building management capacity, and enhanced governance capacity through the development of tools for youth engagement and the establishment of processes for leadership engagement in strategic planning.
2660	Gwawaenuk Tribe (Kwakwaka'wakw Nation)	Gwawaenuk TEK/TUS Digitizing/Referral	In order to respond to referrals, we need to digitize a large volume of TEK/TUS into a digital database (using Access and GIS) and we need to set up a complete referral response system. We need to continue to develop our human resource capacity and need training too.

BCCI File#	APPLICANT NAME	PROJECT TITLE	SYNOPSIS
2675	Iskut First Nation	Strategic Comprehensive Planning	Iskut First Nation would like to undertake the pre-planning and planning stages of a Comprehensive Community Plan (CCP) that will be prepared by the community for the community with the help from a Lands Manager that will be hired to assist in the development of this document that will guide our community into the future.
2624	Kitsumkalum Indian Band	Spokechute Traditional & Historic Land Management & Use	The Kitsumkalum Indian Band a tribe proper of the Tsimshian Nation traditionally used "SPOKCHUTE" as a winter village and a place where cultural activities occurred pre-contact. This project will create and implement a land base management project based on Kitsumkalum Traditional Knowledge and Traditional Environmental Knowledge. Recording and establishing a traditional use community management plan for a long term land resource use for band members.
2604	Kwadacha Indian Band	Historical Land Use Legacy Project (Phase III)	This project will create a centralized, in-house database that will manage increasing volumes of information, repatriate and organize Band related land use video and other digital data from neighbouring Bands and organizations. This system will dovetail with the SharePoint system developed in earlier phases. Newly skilled/confident Elders will record data from recently identified "hot" zones identified by KNRA (resource agency).
2656	Kwiakah First Nation	Kwiakah Strategic Planning	The project is for various works related to the acquisition of crown land set aside for Kwiakah. Activities include the development of an Action Plan; Management and Sustainability Plans; gathering mapping information; site planning; an inventory of environmental, cultural and natural resource values; an Engagement Strategy (provincial, federal, municipal and FN) and a Negotiation Strategy.
2615	Leq'a: mel First Nation	Comprehensive Community Plan - Phase 1	Leq'a:mel First Nation would like to develop a vision for the future. We are proposing to undertake the first year of a two year Comprehensive Community Plan (CCP) program. We propose to undertake the pre-planning and planning components of a Comprehensive Community Plan which will enhance capacity to prepare for consultation and negotiation of lands and resources components of current and future settlement agreements.
2720	Lhoosk'uz Dene Nation	Web-based Consultation and Accommodation Development	This project will build the technological capacity required to effectively deal with land and resource management. Utilizing custom designed simple, yet powerful spatial analysis software, the Lhoosk'uz Dene will be able to effectively engage in meaningful consultation with industries interested in resources throughout their asserted traditional territories.
2674	Lil'wat Nation - Mount Currie Band	Community Engagement & Cultural Information	This project will build upon our existing referral processes and territorial land use plan, allowing us to more effectively respond to referrals through enhanced consultation with Lil'wat community members. In addition, this project will improve our ability to share important cultural and traditional use information with the Lil'wat people as well as our regional neighbours.
2681	Lyackson First Nation	Lyackson Incremental Treaty Engagement Strategy	The Lyackson First Nation has been approached by the Province of BC to identify whether or not the First Nation was interested in engaging in the Provincial Incremental Treaty Agreement Program. The First Nation has identified a number of areas of interest that could be negotiated and wish to consult with the Lyackson Mustimuhw (People) to confirm the areas of interest and to engage the Province of BC in negotiations.
2632	Matsqui First Nation	Comprehensive Community Plan Phase 2 - Implementation & Monitoring	Matsqui First Nation would like to complete the implementation and monitoring stages of our Comprehensive Community Plan (CCP) while engaging with external entities to explore beneficial partnerships. Our project will provide for community engagement, participation, and consultation that will result in a community adopted CCP.
2680	Musgamagw Tsawataineuk Tribal Council	Musgamagw Dzawada'enuxw Land & Resource Management Office	This project will create a MTTC Lands & Resource Department which will serve as the vehicle through which the bands regionally respond to referrals, pursue land and marine resource planning, management and resource-based economic development activities through setting up office, staff training, and policy development.

BCCI File#	APPLICANT NAME	PROJECT TITLE	SYNOPSIS
2676	Musqueam Indian Band	Sustainable Monitoring and Evaluation of Musqueam's Community Plan	Musqueam proposes to engage a Community Planner to build Musqueam's management capacity, rooted in the recently completed Comprehensive Sustainable Community Development Plan (CSCDP). The Community Planner will begin community-based monitoring and evaluation (M&E) of the CSCDP, and develop a best practice model for First Nations-specific M&E.
2612	Nee Tahi Buhn Indian Band	Develop Comprehensive Community Based Plan	Nee Tahi Buhn Indian Band needs guidance in establishing a direction for the future. There is a real need to identify and determine specific actions to realize the Band's direction through specific community involvement that will ensure "buy-in" by the community members. The resulting plan will help create a sustainable community.
2690	Neskonlith Indian Band	Negotiating & Community Engagement with Membership for Real Results	By utilizing a real life ongoing negotiation with the Ministry of Transportation & Infrastructure (MoTI) the leadership wishes to establish negotiation decision making structures that engage the community to win positive results, are transferable to other community driven negotiations as well transferable to other Secwepemc Lakes communities.
2657	Nuchatlaht First Nation	Nuchatlaht Comprehensive Community Planning & Communications Project	Conduct comprehensive community planning process; develop/strengthen communications/information management capacity (web site, online information database, etc.).
2717	Nuu-chah-nulth Tribal Council	Developing Capacity for Aquatic Resource Management	As a part of Uu-a-thluk's continued efforts to build capacity for Nuu-chah-nulth Nations, the proposed project will include: 1) Training and education targeting skills necessary to fully participate in aquatic resource harvest and management, 2) Mentorship and employment targeting capacity in three Nuu-chah-nulth interns, and 3) Organizational development to improve the management of aquatic resources in Nuu-chah-nulth Ha-ha-houlthee.
2714	Nuxalk Nation	Nuxalk Protected Area Management and Tourism Development Project	Implementation of the Nuxalk Nation and Province of British Columbia Protected Area Collaborative Management Agreement [PACMA] (ratified 2010) is lagging for lack of capacity. The Project addresses Nuxalk capacity needs for PACMA implementation and identifies Tweedsmuir Park collaborative management planning as the first milestone in achieving collaborative management planning in Protected Areas throughout Nuxalk Ancestral Territory.
2634	Quatsino First Nation	Quatsino First Nation CCP Completion Project	Quatsino First Nation in the final stages of Step 4 (Build a Comprehensive Strategic Framework) in the CCP planning process and in the initial stages of developing a Strategic Plan for Governance by March 31, 2012. The objective of this project is to build upon and consolidate the successes of QFN planning, by completing of the QFN CCP March 31, 2013.
2633	Secretariat of the Haida Nation	Haida Governance Project	To make major revisions to the Constitution of the Haida Nation and hold a special House of Assembly to have these proposed revisions approved or rejected by Haida Citizens; to develop capacity building plans for all current and future SHN employees in all departments that address all training requirements and to continue the training of the GIS staff that will lead to certification for each of the three staff members.
2601	Shuswap Nation Tribal Council	Internal Regulatory Framework for Secwepemcúlecw	This 1-year project will establish a regulatory framework that can be used by the 9 SNTC member bands to settle internal disputes within our traditional territory. Developing such a framework will allow for consultation and accommodation areas, land use responsibilities and opportunities to be clearly structured. Two conferences, quarterly sessions, monthly technical meetings and promotion of our virtual library will additionally serve this work.

BCCI File#	APPLICANT NAME	PROJECT TITLE	SYNOPSIS
2731	Shxw'ow'hamel First Nation	Comprehensive Community and Land Use Planning Initiative	Shxw'ow'hamel First Nation's Project's will continue to support each other on working towards a healthy, educated, cultural and self-sufficient community. Shxw'ow'hamel strives for economic and political autonomy. It is critical to have plans and measures in place to have our vision become a reality. We are aware that we need a strong economic base and continue to investigate new economic development and land use initiatives thru the development, creation, approval and implementation of a Comprehensive Community Plan to include a Land Use and Strategic Plan.
2609	Sik-e-dakh Band (Glen Vowell)	Comprehensive Land Use Plan	This project will develop standards and policies to strengthen our Comprehensive Community Plan by developing a Land Use Plan, Guidelines, and Land Management Policies. Our project will hire a Land Use Coordinator to oversee the project and ensure the planning process and achievements have been met.
2727	Simpcw First Nation	Simpcw Links Genealogy to Geography	Simpcw First Nation would like to be able to link genealogy of the Simpcw ancestors to present and apply that knowledge to trace it to the land and resource use within Simpcw's traditional territory. For Simpcw First Nation to receive capacity building to be able to organize archival research data, display traditional and cultural artefacts, and search for their ancestors.
2627	Skeetchestn Indian Band	Capacity Development Project	Skeetchestn Indian Band Council participates in negotiations, consultation with several parties including: BC Hydro, CP rail, CN Rail, Spectra Energy and Ministry of Forests. In the territory they also participate in negotiations as a Joint Council of Skeetchestn Indian Band and Tk'emlups (Kamloops) Indian Band. In this project they will build require Capacity Building.
2649	Skidegate Band Council	Skidegate Band Strategic Plan	The project is designed to update the plan completed in 2005 and to develop the operational plan to ensure the goals developed by the community, council and staff are achieved in preparation for future settlement agreements. The project will also build capacity of Skidegate Band members, staff and Council in the development of land and resource governance structures.
2659	Skin Tyee Nation	Skin Tyee Nation Comprehensive Community Plan	Skin Tyee Nation would like to take advantage of the opportunities available to them through their land and resources by establishing a Comprehensive Community Plan for the community, created by the community, to establish a course of action for the future. This plan will provide direction and vision for the Nation in all areas including economic development resource options, and exploring development partnerships with external collaborators. Community involvement at all stages will ensure a community driven CCP for the community members, by the community members. The resulting plan will help create a sustainable community.
2664	Soda Creek Indian Band (Xats'ull First Nation)	Mining Guidebook and Agreement Implementation	Building on the 2011-12 BCCI project, the Soda Creek Indian Band ("Xat'sull") will negotiate with government and "early adopters" in the mining sector to implement the Xat'sull Mining Best Practices Guidebook. Xat'sull will train existing Natural Resources staff regarding best practices, the mining cycle (hard rock and placer), the environmental assessment process and negotiations, and work with government on a consultation protocol.
2621	Splatsin First Nation	Splatsin – 2nd Phase, Land Use Plan	A review of Splatsin's challenges and opportunities indicates this project funding is needed so we can do a minor update of our Title and Rights Department strategic plan, add a front end section to our First Phase – Land Use Plan that will include a vision, how we manage and share our lands and resources through agreements with industry and the selection of an area for our forest tenures.
2689	St Mary's Indian Band	St. Mary's Indian Band Resource Inventory & Resource Policy Development	An inventory will be conducted to measure the forest on the reserve and the location of noxious weed centres. Studies will be conducted to measure the solar potential of the reserve and the reserves potential to produce high yield forest plantations. Policies will be developed to control access and range activities on the reserve. Staff will be trained in negotiations to allow them to advocate for the best use of these identified resources in the future.

BCCI File#	APPLICANT NAME	PROJECT TITLE	SYNOPSIS
2620	Sto:lo Nation Society	Technical Infrastructure for the Development Referral Review Process	SRRMC will extend the technical infrastructure for the referrals web portal that is being developed for Sto:lo communities through a BCCI 1112 grant. The next phase is to have the referral process on-line, provide a web view for each proponent and government department for the status of their referrals, and link the web portal for referral data transfer from government. Pilot VGI of current wildlife, plant, cultural and clean water use locations.
2718	Stone Indian Band (aka Yunesit'in Government)	Yunesit'in Land and Resource Governance Policy Initiative	The 2012/2013 BC Capacity Initiative proposed for Yunesit'in First Nation will create a land and resource use governance plan, policies, procedures, as well as create family plots of the Yunesit'in Territory. This process will assist in building our community's capacity to prepare for consultation and management of Land and Resource Use in the Yunesit'in First Nation. It is an opportunity in which we can strengthen our Land and Resource Strategic Plan. We have selected a local Yunesit'in community member, Russell Ross who has a Masters in First Nations Governance to manage this project. It will build upon the prior BCCI projects that Yunesit'in has completed in the past.
2625	Stwecm'c Xgat'tem (Canoe Creek)	Comprehensive Community Plan Phase 1	We need to develop a vision for the future. We are proposing to undertake the first year of a two year Comprehensive Community Plan (CCP) program. In the 2012/13 fiscal year, we propose to undertake the pre-planning and planning components of a Comprehensive Community Plan which will enhance capacity to prepare for consultation and negotiation of lands and resources components of current and future settlement agreements.
2723	Takla Lake First Nation	TLFN - Setting the Groundwork for Resource Management	This project seeks to enhance land and resource information and cultural values through community engagement, research and training. Development of a fisheries strategy will increase our capacity for land and resource management. Meetings with the final Keyoh groups to review resource maps will greatly assist the development of our Land and Resource Plan and aid in ongoing consultation and negotiations with government and industry.
2694	Taku River Tlingit First Nation	Land and Resources Capacity Building Project (2011/2012)	Employment Skills Training to educate Taku River Tlingit First Nation Citizen's in key areas that support consultation, negotiation and management of land and resources. The training will enhance their capacity for implementation and management of future agreements and how to reply to land referrals.
2725	Tla-o-qui-aht First Nation	Tribal Parks Policies and Mapping Training	Tla-o-qui-aht has been working on negotiating interim agreements and protecting its natural resources through innovative approaches. Once such approach has been the creation of a Tribal Park within our territory. This project will focus on completing our land use plan, and build capacity in planning, mapping and GIS. We will invite other First Nations to share and learn from our experiences.
2685	Tl'azt'en Nation	Tl'azt'en Nation Keyoh Stewardship Project	Implement the Tl'azt'en Nation Cultural Ecosystem Based Conservation Plan with the natural resources staff and the Tl'azt'en Nation Hereditary Keyoh stewards of the land.
2655	Tlowitsis First Nation	Tlowitsis Nation Land & Resource Database and Living Map Development Project	This Project will address the land and resource information capacity gaps of the Tlowitsis Nation by training 5 members in GIS skills, collecting field data to populate a territorial land and resource database, and using this data to develop a 'Tlowitsis Living Map' for improving community engagement and enhancing preparedness for land and resource consultations and negotiations as articulated in the Tlowitsis Nation Strategic Plan.
2722	Tsilhqot'in National Government	Preparing for Land Use Planning and an Enhanced Relationship with BC Government	This project will substantively enhance Tsilhqot'in land and resource management (LRM) capacity at both the community and nation level. Tools developed include consolidated and updated LRM policies, cumulative impacts assessment and spatial modeling. Developing practical options to replace the TFA will contribute to long-term structural and financial support for effective land use decision making.

BCCI File#	APPLICANT NAME	PROJECT TITLE	SYNOPSIS
2677	Union of British Columbia Indian Chiefs	Stewards of our Heritage Resources: BC First Nations Heritage Planning Toolkit & Pilot Project	Collaboratively develop a free, user-friendly, peer-reviewed, and flexible BC First Nations cultural heritage conservation planning toolkit, available to all BC First Nations; and, carry out a pilot project with three partner communities using the toolkit to develop their own heritage conservation plan. This project fits within the mandate provided by the First Nations Heritage Conservation Action Plan.
2608	Whispering Pines/ Clinton Indian Band	Enhancing Independence and Interdependence on our Lands and Resources	We need to control and increase our capacity to be prepared to manage and educate our people on our Clinton reserve lands, consult with appropriate agencies/organizations, and negotiate fair settlements and/or arrangements in the future by hiring band members as land and resource workers to respond in a timely manner to any land referrals/issues that may arise as a result of not having information readily available.
2622	Yakweakwioose First Nation	Comprehensive Community Planning	Yakweakwioose First Nation is ready to undertake a Comprehensive Community Plan. Our community is feeling development pressures and we have limited resources to address this growing problem. Our project will look at potential opportunities related to development pressures but also look at how to improve health, governance, infrastructure, and cultural components within our community.

Synopsis of Approved Projects (59)

FILE #	APPLICANT NAME	PROJECT TITLE	SYNOPSIS
2874	Adams Lake Indian Band	Traditional Use and Occupancy Study, Archives and Digital Database Development	In the past several years Adams Lake Indian Band has participated in several small Traditional Use and Occupancy studies as well as doing some archival research and reporting. This project will roll up all of these reports as well as fill in gaps and unfinished transcriptions from the original 1999 TUS in order to develop a baseline to deal with the d referral tracking system.
2888	BC First Nations Energy and Mining Council (FNEMC)	Workshop/ Information Sessions on Resource Development - Impacts/ Benefits	FNEMC in advancing its Energy Action Plan and in support of BC's Energy Action Plan will engage First Nations to provide information about energy development and the opportunities for First Nations. The topics will focus on: <ul style="list-style-type: none"> - Impact Benefit Agreements; - Liquefied natural gas - build an understanding of LNG, associated pipelines, and markets for this gas; - Natural gas pipelines; and - First Nations equity opportunities through partnerships with various companies proposing projects.
2824	Beecher Bay First Nation	Community Engagement & Visioning for the Future	Beecher has been working on negotiating a modern treaty through Te'Mexw Treaty Association for almost 20 years. Negotiations are now a critical stage, with an Interim Treaty Agreement recently announced and an AIP approximately one year away. Currently there is a significant gap in the community in seeing what treaty will do for Beecher. This project will work towards developing a community based vision of what Beecher wants from the treaty process. This will be achieved by hiring a facilitator engage the community through existing and new [committees] with the goal of developing a community based vision for moving forward.
2866	Canim Lake Indian Band	Traditional Knowledge	Complete the preservation of Canim's Traditional Knowledge by transcribing tapes and creating a secure off-site data repository for all digital data. This is the logical completion of work done with BCCAPACITY in 2011-2012 and 2012-2013 by Canim Lake. Complete the Moving Picture Migration and burn to DVD. Incorporate newly discovered Place Names and clean up existing digital data.
2918	Carrier Chilcotin Tribal Council	Nuxalk Grease Trail Implementation Project	To refine and implement the new Nuxalk Carrier Grease Trail Management Plan: form a governing steering committee, archaeology assessment and mitigation, assessing visual quality objectives and detailed trail assessment.
2917	Carrier Sekani Tribal Council	Natural Resource Negotiation Support	This project will focus on establishing a CSTC Natural Resources Department and support the institutional capacity building of the CSTC through operationalizing policies and procedures. Focus will be given to oil, gas and mining policies as they are most affecting the CSTC. Mapping, use and occupancy methodology and land use planning workshops will be offered to enhance the capacities being built in CSTC communities.
2815	Cowichan Tribes	Comprehensive Community Plan- Phase 3	Having completed the first two phases of Cowichan Tribes CCP project, data collected to date will be compiled with data collected during a 2013-14 fiscal year pertaining to urban off-reserve needs, and land use planning to identify lands and related land resources within what is Cowichan Tribes territory. The desires and concerns, as expressed by our membership will support the collective values and the realization of consensus based community visioning. These goals will form of an action plan to be presented to and shared with our leadership to ultimately drive strategic operations.
2811	Daylu Dena Council (Liard First Nation)	Building Capacity	Community Strategic Engagement Coordinator will receive training to implement the new Strategic Engagement Agreement for government-to-government shared decision-making with BC. The Coordinator will build on existing Kaska capacity to implement the regulatory framework of the agreement regarding consultation, negotiation, implementation, and management of land and resource development decisions. Specific focus will be community engagement.

FILE #	APPLICANT NAME	PROJECT TITLE	SYNOPSIS
2846	Dease River First Nation	Building Capacity in the Community	Community Strategic Engagement Coordinator will receive training to implement the new Strategic Engagement Agreement for government-to-government shared decision-making with BC. The Coordinator will build on existing Kaska capacity to implement the regulatory framework of the agreement regarding consultation, negotiation, implementation, and management of land and resource development decisions. Specific focus will be community engagement.
2935	First Nations Technology Council	Land & Resource Management System Phase 2	This project will: i) Build the Project Management Module of its Land & Resource Management System, in order to provide First Nations bands/organizations with the project management framework and tools needed to manage projects related to making land and resource use decisions; ii) Build the Mapping/GIS Module of its Land & Resource Management System, in order to provide First Nations with the capacity to do Internet based Mapping/GIS without the need for specialized software and is used in support of the Project Management and Referrals Modules; iii) FNTC will perform the Implementation/Roll-Out Phase of its Referrals module, provide training for the Referrals module, and expand the Referrals module to include community involvement in the Referrals process.
2830	Gitanyow Huwilp Society	The Gitanyow Lax'yip Shared Decision-Making Portal and Online Atlas	The project will provide core GIS services and research and development of an online portal and atlas to support the implementation of the Gitanyow Lax'yip Land Use Plan ("GLLUP" signed Mar. 2012) and Shared Decision-Making Framework (initialled Mar. 2013). The portal will improve the processing of Shared Engagement Records and help to ensure land and resource activities are consistent with the GLLUP.
2880	Gitga'at First Nation (Hartley Bay)	Gitga'at Marine and Land Use Inventory	The traditional use and occupancy information collected, protected and made accessible through this project will greatly enhance the capacity of the Gitga'at First Nation to assert authority over its territory and engage in resource management decision-making. We will complete this project in three stages. First, we will document and synthesize existing information through literature and archival research and traditional use interviews. Second, that information will be protected and accessible in a new information management database. Third, Gitga'at staff and others will be trained on how to use the database to ensure the information is used for its intended purposes.
2834	Gwa'sala-Nakwaxda'xw	Referrals, Employment Opportunities and Youth Mentorship Project	Our Referrals, Employment Opportunities and Youth Mentorship Project will build on 09-10, 10-11 & 12-13 BCCI project deliverables in 3 areas: 1) establish a referrals committee to "test-run" a community-centred and culturally appropriate referrals review and decision-making process; 2) implement an HR process to link community members with land and resource employment opportunities; and 3) mentor youth in modern and traditional land use activities.
2845	Halfway River First Nation	Strategic Planning for Chowade, Butler and Hackney Hills	Community strategic vision and planning for land and resource management at the culturally significant areas of Chowade, Butler Ridge, and Hackney Hills. Community meetings, site visits, mapping, and strategic planning for land and resource management.
2812	High Bar First Nation	Traditional Use Project	The High Bar First Nation is about to undertake a number of Forest Industry opportunities within its Traditional Territory. To better understand the types, location and extent of Traditional Uses upon the landscape, the Project will interview Elders and Current Users of the landbase. Information gathered will then be field reviewed, documented, GPS and entered into files and an ArcGIS mapping database.
2828	Kwadacha First Nation	Historical Land Use Legacy Project (Phase IV)	The Historical Land Use Legacy Project will fully implement and align its centralized in-house database with the land use planning department. We will populate the system with robust data and evolve the database into a mainstream land and resource component for negotiations and consultations. We will continue to strategically engage land use stakeholders to survey and define priority areas. We will integrate this information into our streamlined Elder interview protocol for recording traditional land use and resource management knowledge. We will expand our Band member training and more broadly showcase the project in the community.

FILE #	APPLICANT NAME	PROJECT TITLE	SYNOPSIS
2814	Kwikwetlem First Nation	Cultural and Heritage Project	Prepare for treaty process: GIS mapping of territory along with current and past oral histories, documents our traditional uses as evidence for treaty process and to protect against overlaps.
2889	Laich-Kwil-Tach Treaty Society (Hamatla Treaty Society)	Heritage Policy Development	The Laich-Kwil-Tach Treaty Society anticipates the release of the Union of BC Indian Chiefs Heritage Planning Toolkit this spring. The toolkit was developed with the support of BCCI. We plan to use this toolkit to develop a Laich-Kwil-Tach policy on heritage. Our project will include extensive consultation and collaboration with community and Elders to ensure that our policy reflects our traditional values as we strive for greater involvement in heritage management decisions. It will also include consultation with archaeologists, industry and local government in an effort to develop better local heritage management protocols.
2878	Leq'á:mel First Nation	Comprehensive Community Plan - Phase 2	Year 2 of the CCP program at Leq'á:mel builds on the vision articulated by members in Year 1, identifies strategic priorities, and initiates measures to begin operationalizing the CCP.
2850	Lower Nicola Indian Band	Lower Nicola Indian Band - Territorial Land Use Planning	The LNIB propose to complete a land use plan for their Traditional Territory. The project meets several areas of interest in the Band's CCP Scoping Framework (the Band's strategic plan) and is considered an immediate priority based on the volume of major project activity proposed for the territory. The project plan has a significant community engagement component to ensure that the final results and capacity developments meet the Band's current and future requirements.
2808	Matsqui Indian Band	Comprehensive Land Use Plan	This project will develop standards and policies to strengthen our Comprehensive Community Plan by developing a Land Use Plan, Guidelines, and Land Management Policies.
2882	Musqueam Indian Band	Records and Document Access Project	Musqueam proposes to develop, review and update the intellectual and physical infrastructure needed to improve access to and use of Band records. This project will help us strengthen and develop consultation policies and procedures and provide ready access to documents relevant to the types of negotiation and settlements listed, above. Additionally, we expect this increased capacity to improve records access and enhance relationships both internally and externally.
2873	Nak'azdli Band Council	Moving Forward: Strategic Governance and Planning for the Nak'azdli Nation	This project will build on traditional knowledge and land use to inform a Governance Plan that accurately reflects the cultural values of the Nak'azdli. A template for a land use plan will also be established by working with one Keyoh (family) to identify and map cultural, ecological and resource values. These, in turn, will establish a strong foundation in which to negotiate with government and industry on the land and resources in the territory.
2862	Namgis First Nation	Namgis Archaeological Overview Assessment and Development of Accessible Related Cultural Research	The project will support development of an Archaeological Overview Assessment, archaeological training of Namgis members, and translation of technical ethnographic research.
2927	Nee Tahi Buhn Indian Band	Develop a Comprehensive Community Based Plan	Nee Tahi Buhn Indian Band needs continued guidance in establishing a direction for the future. There is a real need to identify and determine specific actions to realize the Band's direction through specific community involvement that will ensure "buy-in" by the community members. The first year of CCP work has laid a solid foundation for establishing a sustainable band model and development programs for band members.
2904	Nuchatlaht Indian Band	Nuchatlaht Comprehensive Community Planning and Communications Project Phase 2	Continue CCP planning process; strengthen communications/information management capacity, newsletters, web site. Obtain final community approval of Land Use Plan and Implement. Community consultation re: areas to focus on, continue consultation process to develop strategic plans in areas of focus.
2833	Nuu-chah-nulth Tribal Council	Increasing Nuu-chah-nulth Capacity for Aquatic Resource Management	As a part of Uu-a-thluk's continued efforts to build capacity for Nuu-chah-nulth Nations, the proposed project will include: 1) Training and education targeting skills necessary to fully participate in aquatic resource harvest and management, 2) Mentorship and employment targeting capacity in three Nuu-chah-nulth interns, and 3) Organizational development to improve the management of aquatic resources in Nuu-chah-nulth Ha-ha-houlthee.
2911	Okanagan Indian Band	Preserving Syilx Traditional Ecological Knowledge	Creation of a Geographic Information Layer and linkage to a Referral Data Base, the sites will be identified through various interviews, TUS studies and ongoing Cultural Heritage Work.

FILE #	APPLICANT NAME	PROJECT TITLE	SYNOPSIS
2925	Okanagan Nation Alliance	Sylx Standards and Policy Development for Resource Stewardship and Collaborative Land Management	This project will support the development of vital ONA/Sylx standards and policies within at least 11 categories associated with land and resource stewardship and collaborative management.
2915	Osoyoos Indian Band	Osoyoos Band Forest Resource Management Capacity Development	This project has the following objectives: to provide professional natural resource management training and skills development to the band's natural resource management team through enhancement of the band's human resources capacity (i.e. professional mentorship, on-the-job training); to increase the natural resource management database capacity through an improved information database and new data management tools (i.e. resource inventories, digital databases, Elder interviews); to enhance the natural resource management staff's skills through forestry specific training and on-the-job assignments that support consultation, negotiation and management of natural resources (i.e. learn to lead consultation and accommodation processes); and to improve natural resource management staff's management capacity through specific training that support negotiation of new or enhanced organizational arrangements with government and industry (i.e. strategic partnerships, operational agreements, memorandums of understanding, impact benefit agreements, etc.).
2823	Pacheedaht First Nation	Community Heritage Project	PFN has provided 6 months of training for five Pacheedaht members in TUS data creation and information management systems; mapping, GIS, interview techniques. BCCI funding would be used to hire two of the trainees to utilize the introductory training skills that they have received. They will research, identify, document, compile and organize traditional and temporary use of Traditional Lands, waters and resources. This project will also see the development of the PFN Archives and Treaty Library.
2861	Penelakut Tribe	Implementation and Monitoring of Our Comprehensive Community Plan	This project will allow Penelakut Tribe to finalize the Comprehensive Community Plan by implementing actions that focus on the social, cultural, environmental, and economic issues related to our lands and resources. This project will prepare the Tribe to respond to community issues effectively and consistently by having information readily available and enable us to manage our lands and resources in a sustainable approach.
2938	Penticton Indian Band	Penticton Indian Band Referral Response Initiative	To develop a Land Referral Governing System - The Penticton Indian Band receives approximately 100-150 referrals per day. The Band will develop land & resource governing structures and frameworks to implement the Band's consultation policy. The Band requires a referral tracking system. This project will be vetted through the Band's Land Use Planning team in order to develop governing structures and regulatory frameworks to better manage our area of interest. The Band will acquire an electronic tracking system to efficiently manage the referrals. The Band must also work closely with the Okanagan Nation and the Traditional Ecological Knowledge Keepers when establishing the governing structures.
2930	Quatsino First Nation	Land Planning Department	The QFN's current CPP has identified the important need to create a QFN Land department. The goal of this year's BCCI project is to create a QFN Lands department. This Lands department will utilize the QFN's Referral Tracking System (RTS), GIS training and skills with the QFN Traditional Use and Knowledge (TUS) database to enable Lands management decisions predicated on the thorough identification of impacts and benefits that will be presented clearly and efficiently to the community and leadership. The QFN Lands department will require a Lands Manager capacity to create and implement mandates, to create management procedures, coordinate resource management positions, and to continually identify protocols and positions that maximize and manifest all socio-economic opportunities for and to the QFN community.
2907	Scowlitz First Nation	Foundation For The Future	Scowlitz would like to commence engaging with our citizens to assist in the development of a comprehensive community plan. This project will allow us to engage and compile key information as to what the communities aspirations are and confirm where we need to focus our attention to.

FILE #	APPLICANT NAME	PROJECT TITLE	SYNOPSIS
2944	Skeetchestn Indian Band	Development of Training Regime for Cultural Heritage Assessment Workers	Over the past 10 years Skeetchestn has developed a cultural heritage assessment process for forestry. Working in conjunction with Shuswap Nation Tribal Council we were instrumental in having Cultural resources recognized as a separate resource from archaeology in F.R.P.A. legislation. The opportunity now exists for us to implement our process throughout the Kamloops forest district except we have formal training program for cultural resource assessors. This project will develop the program along with some as yet undeveloped curriculum as well as train a pilot group of individuals as cultural resource field assessors.
2854	Skin Tye Nation	Skin Tye Nation CCP Part 2	Skin Tye First Nation would like to continue for its second year with the development and implementation of our Comprehensive Community Plan (CCP) while engaging with external entities to explore beneficial partnerships for our Nation. This plan will provide direction and vision for the Nation in all areas including economic development resource options, and exploring development partnerships with external collaborators. Community involvement at all stages will ensure a community driven CCP for the community members, by the community members.
2806	Skowkale Indian Band	Participatory Community Planning and Development Framework Plan-Phase 1	The proposal is phase 1 of a 3-phased process for establishing a participatory community planning process for the SFN. See Conceptual Framework. Phase 1 - Development of a Participatory Community Planning Framework; Phase 2 - Development and Implementation of the SFN Action Plan and Phase 3 - Establishing Lessons Learned and Development of a SFN Sustainability Plan.
2839	Siammon Indian Band	Lands and Referrals Advancement Initiative: Phase I	The project is intended to advance the capacity of the nation to respond to land planning and referrals in the first phase through; i) the research and selection of best systems for GIS mapping/referral recording/tracking, ii) enhanced forestry planning iii) a referrals process and roles definition, and, iv) the mentoring of nation staff and trainee engaged in referrals through this projects operational activities.
2848	Splatsin First Nation	Columbia Basin Resource Management	Splatsin has Aboriginal Title and Rights in the Columbia Basin. This basin has suffered massive impacts from the creation of major hydroelectric dams. This project would realize Splatsin's involvement in resource management and decision making in order to reinstate themselves as caretakers in the Columbia Basin by allowing them to deliver programs and activities under the Upper Columbia Aquatic Management Strategic Plan and relating to the Columbia River Treaty.
2813	Squamish Indian Band	Nexwneweyelh (Words of Wisdom) Proposal	The Nexwneweyelh Proposal (Words of Wisdom) will incorporate traditional understanding and knowledge of the Squamish Nation Traditional Territory and provide that knowledge to others in a modern way, through a website and brochures and 4 enhanced maps. By providing information to our government and public partners we can build relationships that promote better understanding of the land and resources within the territory, and assist in providing policy, negotiation, and management guidelines.
2923	Stellat'en First Nation	Understanding Our Cultural Heritage	The Stellat'en First Nation have gathered large amounts of traditional knowledge over the years. The general public does not understand our traditional knowledge. We as Stellat'en First Nation are the teachers of our knowledge and would be honoured to share our knowledge with the general public about our Cultural Heritage. Explaining our now recorded history and information about our traditional territory will help people understand our traditional land use.
2837	Sts'ailes Band	GIS Implementation and Training Project	Sts'ailes will carry out capacity building activities toward the furtherance of the ability to negotiate and consult with government by implementation of a previously developed GIS data directory structure that will allow data to be managed and shared for aboriginal settlement agreements. Training of community members into ongoing staff positions will create sustainability of the system, and knowledge transference. Community participation and engagement will support the advancement of the initiative, and ensure data integrity and accuracy. Expert consultants will provide training to staff, departments and end-users to utilize the system for on-demand mapping.

FILE #	APPLICANT NAME	PROJECT TITLE	SYNOPSIS
2847	Stz'uminus First Nation	Comprehensive Community Plan	Articulation of community vision through consultative process leading to consensus-based creation of a comprehensive community plan. Within the project, the capacity for ongoing community consultation and dialogue will be strengthened through the training of a member of the SFN as a community relations coordinator and the introduction of new approaches to link Band members with Council.
2937	Taku River Tlingit First Nation	Implementation of the Wooshtin Agreements	This project will support on-going capacity building within FL&R to implement the Wooshtin Agreements, including shared decision making with BC on mineral exploration and development.
2865	Tlatlasikwala First Nation	Land Use Plan and Mentoring a Leader Project	The Tlatlasikwala First Nation (TFN) will build on previous work (BCCI 2010-11) which produced a land use plan outline and Land Use Vision. Under this project, TFN will develop a Land Use Plan, Marine Use Plan, and updated Referral Process to increase Tlatlasikwala 's land management and decision-making capacity. The Project will also provide a "job shadow" mentorship opportunity for a community member. Capacity gaps to be addressed through this project are: 1) no Land Use Plan currently exists for TFN. 2) no Marine Use Plan currently exists for TFN. 3) TFNs current referral process is effective but requires review and refinement by Council and Technical Team members. 4) TFN is not part of any land or marine use planning process in BC. 5) TFN Council has identified a significant lack of leadership capacity and familiarity with the Territory in the next generation.
2893	Tl'azt'en Nation	Neyun Whuts'inli: Tl'azt'en Nation Keyoh Stewardship Project	Year 2 of Neyun Whuts'inli Project focuses on fieldwork and policy development to refine "management emphasis" areas identified in Year 1 of project, enabling joint decision-making in land management
2901	Tlowitsis First Nation	Tlowitsis Applied GIS Forestry Modeling and Negotiation Project	The 2012/13 BCCI project "Tlowitsis Land and Resource Database and Living Map Development" revealed critical forestry-related capacity gaps. These gaps indicate a lack of membership expertise needed to engage in consultations. Membership need to acquire the skills, knowledge and experience through training and applied field work necessary to increase their ability to participate in consultation and negotiations regarding forestry operations This project will train Tlowitsis members in field skills for archeological and CMT inventory and riparian analysis. Members will also be trained in the use a GIS forestry modelling tool designed to analyse conventional forestry data and aboriginal knowledge. Advanced negotiation training will consolidate the training, field work and data analysis in support of consultations and negotiations with industry and government.
2868	Tobacco Plains Indian Band	Comprehensive Community Plan - Implementation and Monitoring	Build on the success of the 2010-2011 BCCI initiative by completing our Comprehensive Community Plan by utilizing and training members in land and resources management areas and assessing opportunity.
2913	Tsay Keh Dene Band	Tsay Keh Dene Comprehensive Community Plan 2013/2014	The project's objective is the development of a comprehensive community plan to establish the strategic foundation for where the community wishes to be once aboriginal title settlement agreements have been achieved. It constitutes a roadmap that would take traditional values, our elders' vision and the community's priorities into department-based objectives with manageable tasks and appropriate indexes/benchmarks to measure progress.
2840	Tsilhqot'in National Government	Tsilhqot'in Governance Enhancement Project	The 2013-2014 Tsilhqot'in BCCI proposal focuses on Land and Resource Governance. Outcomes will address four areas of capacity building for the Tsilhqot'in people: governance, forest management, administration, and human resource capacity building. This project will improve processes and coordinate capacities; develop internal/external monitoring of the resource sector; advance a resource management program; and improve human resource coordination and inventory, as well as engage youth in First Nation governance.

FILE #	APPLICANT NAME	PROJECT TITLE	SYNOPSIS
2909	Tsleil-Waututh Nation (Burrard)	Information Management Capacity Building	This project will enhance the capacity of Tsleil-Waututh Nation to manage, mobilize and preserve vital knowledge and information needed to engage effectively in the Nation's ongoing consultation, negotiation, implementation and management of lands and resources components of aboriginal title settlement agreements. The three components of the plan are to create: 1) a database enabling access to various primary sources, including over 200 interview transcripts of oral history interviews with Tsleil-Waututh elders, recorded media, and legal documents for internal research; 2) a physical Archives to preserve and ensure long-term access to physical records; and 3) a digital management plan to effectively digitize and manage electronic records.
2831	West Moberly	Comprehensive Community Planning for West Moberly Land & Resources	Pre-planning and beginning of planning stage for strategic Comprehensive Community Plan. Developing community vision for land and resource management priorities for traditional treaty lands. This stage will establish a representative planning committee, hold family and general meetings, pull together all existing research and studies related to TUS, wildlife studies, TLE land selection processes, land use planning, & industrial and resource development on lands, and work with lands staff to develop maps and materials for community consideration & review for comprehensive community planning.
2890	Wet'suwet'en First Nation	Comprehensive Community Plan	Develop a comprehensive community plan through the engagement of community members. WFN will hire a facilitator and in house assistant to see the draft of the community comprehensive plan.
2896	Xeni Gwet'in First Nations Government	Range Management Plan and 3rd Party Consultation for Land and Resource Management Negotiations	This 2013/2014 BC Capacity Initiative proposal will assist in building community capacity to undertake 3rd party negotiations for sustainable range management planning within the Xeni Gwet'in Caretaker area. Working with both technical consultants and traditional knowledge expertise, field work and facilitated negotiations will be undertaken to develop agricultural zones and guidelines as well as governance policy. Community workshops will be held through out the Caretaker with First Nation and non-First Nation's stockmen to gather initial feedback and agreement regarding these zones and policies. The Xeni Gwet'in's ecosystem-based plan will be used as the foundation from which this zoning and policy development will take place.
2906	Yakwekwioose Indian Band	Comprehensive Community Planning Phase 2	Yakwekwioose would like to complete the implementation and monitoring stages of our Comprehensive Community Plan (CCP), while engaging with external entities to explore beneficial partnerships.
